Outcomes are based on patients' claims post-intervention. Outcome rules are processed after a designated number of days from the date the conflict was generated to identify the clinical impact (120-180 days). As such, the above statistics refer to conflicts generated within the reporting period.

Savings are recognised daily for interventions with positive outcomes, as long as the outcomes hold, for the maximum of 365 days.

Outcomes are based on patients' claims post-intervention. Outcome rules are processed after a designated number of days from the date the conflict was generated to identify the clinical impact (120-180 days). As such, the above statistics refer to conflicts generated within the reporting period.

Savings are recognised daily for interventions with positive outcomes, as long as the outcomes hold, for the maximum of 365 days.
