# Current Plan Design

## ☐ Deductible, Ben Max, MOOP, Copays

| Plan 1 (group BFWRX): |                                                       |
|-----------------------|-------------------------------------------------------|
| Deductible:           | This plan has no deductible.                          |
| Benefit Maximum:      | \$2,000 per year for Growth Hormones medications only |
| Max out of Pocket:    | \$2,850 Individual / \$5,700 Family                   |

| Plan 2 (group BFWRX2) & Plan 3 (group BFWRX3): |                                                       |
|------------------------------------------------|-------------------------------------------------------|
| Deductible:                                    | This plan has no deductible.                          |
| Benefit Maximum:                               | \$2,000 per year for Growth Hormones medications only |
| Max out of Pocket:                             | \$1,850 Individual / \$3,700 Family                   |

### Co-pays

| Plan 1 (group BFWRX) & Plan 2 (group BFWRX2): |                            |             |      |
|-----------------------------------------------|----------------------------|-------------|------|
| Retail                                        |                            | Mail        |      |
| *Generic:                                     | \$10                       | *Generic:   | \$20 |
| *Brand:                                       | \$15                       | *Brand:     | \$30 |
| *NP Brand:                                    | \$30                       | *NP Brand:  | \$60 |
| *Specialty:                                   | Run trial claim for co-pay | *Specialty: | N/A  |

| Plan 3 (group BFWRX3): |                            |
|------------------------|----------------------------|
| Retail / Mail          |                            |
| *Generic:              | 5% (\$5 min.)              |
| *Brand:                | 15% (\$15 min.)            |
| *NP Brand:             | 25% (\$25 min.)            |
| *Specialty:            | Run trial claim for co-pay |

## ☐ Effective 7/1/19

- ☐ Diabetes Program
- ☐ Comprehensive Ums
- ☐ Vigilant Program
- ☐ RxOTC Program

## ☐ Effective 8/1/2020

- ☐ Orphan Drug Program

## ☐ Effective 3/1/2021

- ☐ Opioid Mgmt – tighter refill window & UMs

## ☐ Effective 7/1/2021

- ☐ Premium Formulary
- ☐ Mandatory Mail - MSS

## ☐ Effective 1/1/2022

- ☐ Split-fill/Smart-fill programs

# Key Discussion Topics

---

- ❑ Per Member Per Month (PMPM) trend = -15.5% Specialty trend = -39.8%
- ❑ Specialty accounted for 0.7% of claims
- ❑ Top 5 disease states accounted for 75% of total plan paid
  - ❑ Top traditional disease state: Diabetes
  - ❑ Top specialty disease state: Inflammatory Conditions
- ❑ Clinical Outcome Savings - \$159,200
  - ❑ This is for all PA, ST, QL currently in place (Oct2020 – Sept2021)
- ❑ Vigilant Outcome Savings - \$35,535
  - ❑ Time frame (Oct2020 – Sept2021)

# Clinical Outcomes

# Clinical Outcomes

Outcomes date range: Oct 2020 - Sep 2021

Utilization management savings: \$19.67 PMPM

Your program savings: **\$159.2K**

Ensuring patients meet appropriate clinical criteria when initiating medication therapy not only helps to ensure that the patient is being treated safely according to guidelines, but also drives significant savings for both Bakers Union and FELRA Health and Welfare fund and for members. Bakers Union and FELRA Health and Welfare fund has realized over \$159.2K in savings. Based on a study by OptumRx, leveraging UM strategies that drive members to appropriate and often lower cost medications for treatment can save a member up to \$620 annually in out of pocket copayments.

# Vigilant Program - Outcomes

Outcomes date range: Oct 2020 - Sep 2021

**Total program savings:** \$4.39 PMPM

## Vigilant Drug Outcomes – Cost Avoidance

By leveraging the Vigilant Drug Program, Bakers Union and FELRA Health and Welfare fund has:

- Avoided \$35.5K in pharmacy spend
- Switched 11 claims to lower cost alternatives
- 15 claims were abandoned

TOTAL PLAN PAID SAVINGS

**\$35,535**

# Clinical Opportunities

Copay Card Accumulator Adjustment (CCAA)  
Variable Copay Solution (VCS)

# The growth of copay cards

Copay cards are significantly increasing in availability and use

**\$700M → \$2.7B**

Total drug spend increase from 2007 to 2010 when coupons were offered on 23 drugs facing generic competition<sup>3</sup>

# Copay Card Accumulator Adjustment (CCAA)

Member Experience

## Specialty Medication Fill with a \$100 member copay & available pharma sponsored coupon

*Minimal member impact during drug fill – member impact may occur when coupon dollars NO longer apply to accumulators*

# CCAA - Accumulator adjustment pre-sale summary

- Bakers Union and FELRA Health and Welfare Fund

## PROGRAM OVERVIEW

Provides clients with a real-time solution to prevent copay card dollars from being included in members' accumulators (deductibles and out-of-pocket maximums) to help maintain the integrity an intention of the pharmacy benefit

## REPORTING SUMMARY

Pre-sale savings analysis

| PMPM plan savings estimate | PMPY plan savings estimate | Annualized plan affordability estimate |
|----------------------------|----------------------------|----------------------------------------|
| \$0.04                     | \$0.47                     | \$317                                  |

## Variable copay solution (VCS)

The more copay card dollars redeemed, the less the plan pays for remaining drug cost

### How it works:

**\$4,000** total medication cost

Copay card available with **\$1,000** monthly maximum

### With variable copay solution

### Without variable copay solution

With variable copay, plan saves **\$900**

# Variable experience over time (example)

Drug Cost: \$4,000  
 Patient Drug Copay Before Coupon: \$100  
 Patient Drug Copay After Coupon: \$0  
 Coupon Limit (Annual): \$12,000

In an effort to reduce plan costs, our variable copay solution varies member cost-share for certain specialty drugs at point-of-sale. Variable copay leverages maximum available, pharma subsidized coupon funds, decreasing client's cost-share. Variable copay divides the coupon's annual limit, over 12 months, to set drug-specific copays to maximize yield and decrease plan expenditure.

| Scenario 1: Patient is NOT exposed to variable copay solution |         |         |         |         |         |         |         |         |         |         |         |         | Cost to Patient | Cost to Pharma | Cost to Insurer |

# OptumRx's Copay Program Suite Solution

## Problem

Traditional benefit designs are not leveraging all available manufacturer sponsored copayment assistance card funds

## Solution

Modify the benefit design to leverage maximum yield from manufacturer sponsored copayment assistance cards.

### Variable Copay Analysis

| Average Coupon Penetration                 |                    |
|--------------------------------------------|--------------------|
| Projected specialty prescriptions          | 58                 |
| Projected variable copay fills             | 38                 |
| Projected variable copay potential savings | \$33,757.33        |
| Savings per utilized Rx                    | \$879.10           |
| Projected Program Fees                     | \$5,760.00         |
| <b>Net Potential VCS Savings</b>           | <b>\$27,997.33</b> |

### Analysis Assumptions

- Adoption of the CCAA (free)
- 80% coupon use on eligible claims
- Optum Specialty Pharmacy exclusivity
- No grace fills
- No integrated savings account (HRA) on file
- Member protection
- \$150 per VCS claim fee
- The savings represents a shift from the current collected copay to the monthly maximum of the coupon – the more the coupon redeems, the less the plan pays for the remaining cost of the drug.

## Benefit

Decrease client cost share on specialty drug spend while maintaining the member experience. Shifting costs **from** the health plan **to** pharma sponsored copayment assistance cards.
