Florida West Coast Operating Engineers
Apprenticeship Trust Fund
911 Ridgebrook Road
Sparks, MD 21152

Dear FWCOE Board of Directors and administrators:

I hope everyone is safe and healthy! I have enclosed a review of the FWCOE Apprenticeship Trust portfolio for period ending May 4, 2021.

The portfolio closing value as of 05/04/2021 was \$\$830,357.97 not including interest accruals through 05/04/2021 of \$4,326.08. There were no distributions paid out since the last reporting period.

Interest accruals in a bond is interest the instrument has earned but has not yet distributed and received in the account. The accrued interest is not included in the performance report but would add additional performance if included (See Interest Accrual Detail).

Most of the fixed income securities actually distribute interest on a semi-annual basis. The current forward-looking gross distribution yield (before advisory fees) of the portfolio based (excluding money market) is 2.85 % or \$23,545 (see Cash Flow Report – page 19 of 22).

The portfolio does not have any securities on watch or of concern as of 05/04/2021. I have included the Investment Policy Statement (IPS) in the review for reference.

I will be on the May 12th video conference to further elaborate as well as offer a Q&A session.

Sincerely,

Tony DuBose, AIF®

About Us

About Legacy Wealth Management

Legacy Wealth Management is committed to helping clients find financial solutions through independent and comprehensive financial planning, tailored investment management approaches, and personalized, personal customer service.

Based in Plantation, Florida, our firm's three locations serve clients in Miami-Dade, Broward, and Palm Beach counties as well as clients across the United States. Our financial professionals have over 150 years of combined experience in the financial industry, providing clients an extensive understanding of complex financial matters.

Our mission is to have positive impact on the lives of our clients and their families by delivering personalized planning solutions and ongoing service far exceeding their expectations. This mission is deeply grounded in our core values of integrity and transparency.

We abide by the fiduciary standard, putting our clients' best interests at the forefront of our work. We strive to be your trusted guide and resource as you pursue your financial goals.

Your Advisor

Tony DuBose is the co-founder and Managing Principal of Legacy Wealth Management. Tony has assisted individuals, families, and institutions in pursuing their financial goals for over 20 years. His primary goal as a wealth advisor is to understand each client's unique needs and goals, and to advocate for his clients' best interests. He is Chief Investment Officer (CIO) of the firm, working with the investment committee to determine and execute key investment strategies.

"As an avid pilot, I relate much of flying a plane to investment management. Both are about knowing, understanding, and mitigating risks. Both are about keeping calm and alert in moments of sudden change. And both are about getting to where you want to go."

Tony enjoys expanding his knowledge of the latest in business development, client service, and critical investment advisory activities through his annual attendance of LPL Financial's Advisory Leaders Forum, an exclusive three-day academic experience held at such universities as Duke and Northwestern's Kellogg School of Management.

Tony graduated from Valdosta State University in 1983. He enjoys using his aviation skills to complete humanitarian missions for various nonprofit organizations. He also serves on the Board of the Circle of Friends of the NSU Alvin Sherman Library. He resides in Davie with his family.

Global Portfolio Strategy

UPGRADED GDP, EARNINGS, AND INTEREST RATE FORECASTS

LPL RESEARCH'S MONTHLY MARKET OUTLOOK

Key changes from March's report:

- None

We have increased our forecast for U.S. gross domestic product (GDP) growth in 2021 to 6.25%–6.75%, up from 5%–5.5%, due to prospects for a full reopening of the U.S. economy, massive stimulus, and Federal Reserve (Fed) support. With stronger economic growth comes more revenue opportunities for corporate America, so we have also raised our S&P 500 Index earnings per share (EPS) forecast for 2021, to a range of \$175–\$177.50, up from \$170. The stronger economic growth outlook led us to increase our year-end forecast for the 10-year Treasury yield to a range of 1.75%–2.00%, up from 1.25%–1.75%. We have left our year-end S&P 500 fair value target range unchanged at 4,050–4,100, based on a price-to-earnings (PE) multiple of 21 and our unchanged 2022 S&P 500 earnings forecast of \$195 per share. We anticipate some downward pressure on valuations at higher interest rate levels and a pickup in volatility during year two of the bull market is reasonable to expect.

INVESTMENT TAKEAWAYS

- Our equities recommendation remains overweight. We continue to favor stocks over bonds based on our expectation for a very strong economic and earnings recovery in 2021, supported by an accelerating vaccine rollout, an anticipated full reopening of the U.S. economy, and massive fiscal and monetary stimulus.
- Our favored sectors include financials, technology, and materials, offering a mix of cyclical value and growth sectors. As the economic recovery progresses in 2021, we would expect cyclical value stocks to get a boost, but fundamentals remain very strong for the growth style.
- Key near-term risks include further sharp increases in interest rates from inflationary pressures, possible COVID-19 virus variants, likely tax increases (ETA 2022), and tougher regulations under a Democratic-controlled Congress.
- We continue to favor emerging markets (EM) stocks over their developed international counterparts on a superior economic growth outlook and attractive valuations, though geopolitical and regulatory threats may lead to bouts of volatility and China tariffs may remain in place.
- We continue to recommend an underweight allocation to fixed income. Although we've seen a big move higher in rates, Fed policy and manageable inflation may limit the risk of a large rate move in the near term. Further rising rates may still put some pressure on bond returns while economic improvement may help support equities going out a full year.
- We favor a blend of high-quality intermediate bonds that is underweight U.S. Treasuries with an emphasis on short-to-intermediate maturities and sector weightings tilted toward mortgage-backed securities (MBS).

EQUITY ASSET CLASSES

Stocks Over Bonds Remains Our Highest Conviction Idea

We favor stocks over bonds in 2021 based on our expectation for a very strong economic and earnings recovery this year, supported by an accelerating vaccine rollout, an anticipated full reopening of the U.S. economy, and massive fiscal and monetary stimulus. We expect the economic rebound to pick up steam as the economy more fully reopens, which may help boost performance for cyclical value stocks in the near term. We continue to favor emerging markets (EM) stocks over their developed international counterparts on a superior economic growth outlook and attractive valuations.

	Sector	Overall View	Relative Trend	Rationale
Market Capitalization	Large Caps			The relatively greater financial strength enjoyed by most large cap companies helped during the pandemic. But smaller market cap companies tend to perform better early in economic expansions and during the early stages of bull markets, which has driven significant small cap outperformance since fall 2020.
	Mid Caps			Mid caps enjoy some of the early cycle characteristics of small caps, and therefore, should perform well as a more durable recovery develops. We believe mid cap stock valuations are more attractive than those of small caps in general.
	Small Caps			We maintain our neutral view of small caps with a positive bias. The early-stage bull market and economic expansion and strong earnings rebound provide tailwinds for small cap stock relative performance. Although valuations appear reasonable and small caps are down since mid-March, further weakness is possible with the Russell 2000 Index up roughly 125% since its March 18, 2020 lows.
Style	Growth			Our style views remain balanced between growth and value. We believe growth stocks will continue to be bolstered by strong earnings trends and favorable positioning for the pandemic in the near term. But as more of the economy reopens and economic growth accelerates in the spring, cyclical value stocks may get a boost.
	Value			A durable economic recovery is emerging, which we expect to support cyclical value stocks in the near term. Value stocks remain attractively valued relative to their growth counterparts and tend to perform relatively well when economic growth accelerates. Our recent upgrades of financials and energy tilted toward value.
Region	United States			Among developed markets, we remain U.S.-focused. We see solid gains for U.S. stocks in 2021, but the gap between U.S. and developed international stocks has started to narrow and may close further as the pandemic is brought under control globally.
	Developed International			Our outlook for developed international equities remains negative, but we could potentially warm up to European equities once the pandemic is brought under control in the Eurozone, particularly if the U.S. dollar weakens. Among non-U.S. developed markets, we prefer Japan over Europe based on the country's massive stimulus efforts and relative success containing COVID-19.
	Emerging Markets			We continue to favor emerging markets (EM) stocks over their developed international counterparts on a superior economic growth outlook and attractive valuations, though geopolitical and regulatory threats may lead to bouts of volatility and tariffs may remain in place.

Trend is measured by relative performance of the index for the past 12 months, minus the most recent month, compared to the other indexes in a particular sector or asset class grouping.

EQUITY SECTORS

Rising Rates and Improving Growth Outlook Fuels Financials

We continue to favor cyclical sectors in general for 2021 based on the early cycle stage of the economic expansion, and a bull market, and improving prospects for a strong economic rebound this year. In general, we recommend a mix of cyclical value sectors (energy, financials, and materials) that are well positioned for accelerating economic growth and rising interest rates, and growth sectors (communication services, consumer discretionary, and technology) which are better positioned for the pandemic.

	Sector	Overall View	Relative Trend	S&P Wgt	Rationale
Cyclical	Materials			2.7	The Chinese economy is firing on all cylinders and the U.S. economy is on the verge of a full reopen, supporting commodity prices. Beneficiary of the strong housing market and potential infrastructure package later this year.
	Energy			2.7	Demand outlook has improved and technical analysis signals have turned more positive, but the supply overhang may limit oil price upside as production has become more profitable.
	Industrials			8.7	A likely big beneficiary of an eventual durable U.S. economic recovery, especially if accompanied by more infrastructure spending. China exposure is a positive, though recent earnings weakness has left valuations expensive.
	Communication Services			11.2	Beneficiary of the stay-at-home environment, but the market's rotation toward cyclical value stocks as the economy reopens is a concern and the regulatory environment may tighten. Valuations are reasonable.
	Consumer Discretionary			12.6	Historically a strong early-cycle performer. E-commerce and housing are booming, supporting our neutral view despite rich valuations. Eventual recovery in hospitality, travel, and leisure industries will help.
	Technology			27.0	Benefiting from work-from-home environment and powerful secular trends, but the market's rotation toward value stocks remains a risk, especially if interest rates continue to rise and pressure valuations. Negative bias.
	Financials			11.3	Upgrade to view in March was driven by rising interest rates, steepening yield curve, and strong technical momentum, while economic reopening supports rotation into value style. Valuations remain attractive. Tepid loan demand a concern.
Defensive	Utilities			2.6	Valuations are reasonable and more green energy spending may help boost growth, but rising interest rates and the market's preference for cyclical stocks are headwinds. Favor healthcare among defensives.
	Healthcare			12.7	The healthcare spending outlook, demographics, and valuations are supportive, and policy clarity may help performance at some point, but economic cycle, earnings, and technical trend considerations temper enthusiasm.
	Consumer Staples			61	Historically a poor relative performer early in economic cycles as a defensive sector. Rising interest rates don't help given the sector's attractive yields. Likely outperformer in an eventual market correction.
	Real Estate			2.4	Like consumer staples, likely underperformer early in economic cycles. Mixed fundamentals and interest rate sensitivity suggest caution, though technology and industrial segments are strong.

Investing in real estate/REITs involves special risks such as potential illiquidity and may not be suitable for all investors. There is no assurance that the investment objectives of this program will be attained.

Because of its narrow focus, specialty sector investing, such as healthcare, financials, or energy, will be subject to greater volatility than investing more broadly across many sectors and companies.

FIXED INCOME

Limit Rate Sensitivity With Intermediate Focus

We suggest a blend of high-quality short-to-intermediate bonds in tactical portfolios. We raised our forecast for the 10-year Treasury yield to a range of 1.75%–2.00%, up from 1.25%–1.75% as economic activity continues to impress to the upside. Compensation for longer-maturity, rate-sensitive bonds remains unattractive, in our view, supporting our positive view of MBS. We still see incremental value in corporate bonds over Treasuries, but credit spreads have little room for further tightening.

We favor **municipal bonds** as a high-quality option for taxable accounts, although valuations relative to Treasuries have normalized. Additionally, for appropriate investors, **high yield municipal bonds** offer an attractive yield. The latest proposed stimulus package is expected to provide additional muni-related support.

		Low	Medium	High	Rationale
Positioning	Credit Quality		Credit spreads have tightened significantly, but the economic outlook may be supportive.		
		Short	Int.	Long	
	Duration		Concerns over rising interest rates with the prospects of economic acceleration increase interest-rate risk.		
		Neg.	Neutral	Pos.	Rationale
Sectors	US Treasuries		Yields still low but increasing and we expect yields to continue to increase from current levels. Yield spreads to international sovereigns remain attractive. Inflation breakeven rates leave TIPS fairly valued.		
	MBS		Fed buying is supportive and refinancing and prepayment slowing. MBS may provide some resilience if rates rise. Valuations are stretched so excess returns are limited.		
	Investment-Grade Corporates		Risks tempered as economy improves and vaccine deployment progresses. Leverage metrics have increased, but cash levels are high. Interest-rate sensitivity has increased. Tight credit spreads limit attractiveness.		
	Preferred Stocks		Higher credit quality among the riskier fixed income options. Bank fundamentals sound overall. Can be rate sensitive but may be able to tolerate graduate increases.		
	High-Yield Corporates		Valuations have grown rich versus history but fundamentals remain sound. More attractive for income-oriented investors. We believe equities have more upside and high-quality options may be better diversifiers.		
	Bank Loans		Economic environment supportive and better sector mix than high yield. Economic acceleration may support demand. Fewer investor protections and illiquidity of individual loans remain concerns.		
	Foreign Bonds		Rich valuations, interest-rate risk, and potential currency volatility are among the negatives.		
	EM Debt		Dovish central banks improve the valuation picture and stronger global growth, commodity prices, could be supportive, but spreads no longer attractive. Liquidity can be an added risk during periods of stress.		

Yield spread is the difference between yields on differing debt instruments, calculated by deducting the yield of one instrument from another. The higher the yield spread, the greater the difference between the yields offered by each instrument. The spread can be measured between debt instruments of differing maturities, credit ratings, and risk. **Bank loans** are loans issued by below investment-grade companies for short-term funding purposes with higher yield than short-term debt and involve risk. For the purposes of this publication, **intermediate-term bonds** have maturities between 3 and 10 years, and short-term bonds are those with maturities of less than 3 years.

All bonds are subject to market and interest rate risk if sold prior to maturity. Bond values will decline as interest rates rise and are subject to availability and change in price. **Corporate bonds** are considered higher risk than government bonds but normally offer a higher yield and are subject to market, interest rate, and credit risk, as well as additional risks based on the quality of issuer coupon rate, price, yield, maturity, and redemption features. Investing in **foreign and emerging market debt (EMD)** securities involves special additional risks. These risks include, but are not limited to, currency risk, geopolitical and regulatory risk, and risk associated with varying settlement standards. **High-yield/junk bonds** are not investment-grade securities, involve substantial risks, and generally should be part of the diversified portfolio of sophisticated investors. **Municipal bonds** are subject to availability, price, and market and interest rate risk if sold prior to maturity. Bond values will decline as interest rates rise. Interest income may be subject to the alternative minimum tax. Federally tax-free but other state and local taxes may apply. **Mortgage-backed securities (MBS)** are subject to credit, default, prepayment risk that acts much like call risk when you get your principal back sooner than the stated maturity, extension risk, the opposite of prepayment risk, market and interest rate risk.

COMMODITIES

Positive Outlooks for Industrial Metals and Crude Oil

Our view of **industrial metals** is positive, reflecting China's strong economic growth outlook, an improving outlook for growth in the United States, and the strong technical momentum of copper. A potential resumption of the U.S. dollar's downtrend could provide a boost to industrial metals and commodities broadly.

Our **precious metals** view is neutral. Our December 2020 downgrade of this asset class was driven primarily by our technical analysis work that suggested less upside potential in the near term. The attractiveness of precious metals is further reduced by the improving economic outlook, rising interest rates, and recent firmness in the U.S. dollar.

Our **crude oil** outlook is positive primarily due to positive signals from our technical analysis work. At the same time, the global demand outlook has improved recently as the end of the pandemic comes into view, and higher oil prices have increased the amount of profitable available production. Our concerns remain that the U.S. supply overhang may limit further upside potential for prices and the potential for more production internationally as prices rise. The latest jump in travel bookings is encouraging.

ALTERNATIVE INVESTMENTS

Lackluster End to Strong First Quarter

After a strong first two months of the year, performance in the alternative investment industry was rather muted in March and we saw even more dispersion than usual at the underlying sub-category level. Event Driven strategies, which remain our preferred alternative investment solution, did encounter their first monthly decline (HFRX Event Driven down 0.24%) in six months. First quarter 2021 global merger and acquisition volume hit \$1.3 trillion, representing a 94% increase from first quarter 2020, the second largest quarter, and the largest first quarter figure ever. This provides active managers with a strong pipeline of deals to choose from, as well as reduces industry concentration in specific transactions.

Going forward, a further increase in interest rates is a development that can impact the event driven space in several ways. First, a large increase in corporate borrowing costs could potentially slow down the current pace of new merger activity. While interest rates are moving up from extremely low levels, and it is difficult to predict at what level higher rates might impact markets, this is important to watch. Rising rates, however, may also lead to more attractive deal spreads, on average. This is a result of the market using a higher risk-free rate in discounting the probability of a deal closing. Overall, we maintain a constructive view of the merger and acquisition environment, as it remains supported by access to cheap funding, private equity dry powder to use for deals, and the ability to use near all-time high share prices for stock transactions.

IMPORTANT DISCLOSURES

This material has been prepared for informational purposes only, and is not intended as specific advice or recommendations for any individual. There is no assurance that the views or strategies discussed are suitable for all investors and they do not take into account the particular needs, investment objectives, tax and financial condition of any specific person. To determine which investment(s) may be appropriate for you, please consult your financial professional prior to investing. Any economic forecasts set forth may not develop as predicted and are subject to change.

Stock investing involves risk including loss of principal. Because of their narrow focus, sector investing will be subject to greater volatility than investing more broadly across many sectors and companies. Value investments can perform differently from the market as a whole and can remain undervalued by the market for long periods of time. The prices of small and mid-cap stocks are generally more volatile than large cap stocks. Bonds are subject to market and interest rate risk if sold prior to maturity.

Bond values will decline as interest rates rise and bonds are subject to availability and change in price. Corporate bonds are considered higher risk than government bonds. Municipal bonds are subject to availability and change in price. Interest income may be subject to the alternative minimum tax. Municipal bonds are federally tax-free but other state and local taxes may apply. If sold prior to maturity, capital gains tax could apply. U.S. Treasuries may be considered “safe haven” investments but do carry some degree of risk including interest rate, credit, and market risk. Bond yields are subject to change. Certain call or special redemption features may exist which could impact yield. Mortgage-backed securities are subject to credit, default, prepayment, extension, market and interest rate risk.

Credit Quality is one of the principal criteria for judging the investment quality of a bond or bond mutual fund. Credit ratings are published rankings based on detailed financial analyses by a credit bureau specifically as it relates the bond issue’s ability to meet debt obligations. The highest rating is AAA, and the lowest is D. Securities with credit ratings of BBB and above are considered investment grade. Duration is a measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. It is expressed as a number of years.

Alternative investments may not be suitable for all investors and should be considered as an investment for the risk capital portion of the investor’s portfolio. The strategies employed in the management of alternative investments may accelerate the velocity of potential losses.

Commodity-linked investments may be more volatile and less liquid than the underlying instruments or measures, and their value may be affected by the performance of the overall commodities baskets as well as weather, geopolitical events, and regulatory developments. The fast price swings in commodities and currencies will result in significant volatility in an investor’s holdings.

Investing in foreign and emerging markets securities involves special additional risks. These risks include, but are not limited to, currency risk, geopolitical risk, and risk associated with varying accounting standards. Investing in emerging markets may accentuate these risks. All information is believed to be from reliable sources; however, LPL Financial makes no representation as to its completeness or accuracy.

Earnings per share (EPS) is the portion of a company’s profit allocated to each outstanding share of common stock. EPS serves as an indicator of a company’s profitability. Earnings per share is generally considered to be the single most important variable in determining a share’s price. It is also a major component used to calculate the price-to-earnings valuation ratio.

Gross Domestic Product (GDP) is the monetary value of all the finished goods and services produced within a country’s borders in a specific time period, though GDP is usually calculated on an annual basis. It includes all of private and public consumption, government outlays, investments and exports less imports that occur within a defined territory.

General Disclaimers

² **Missing Price:** One or more investment prices are unavailable. For calculation purposes, investments without a price are assumed to be worthless on the date or dates that the price is missing. This will impact the market values, performance returns and/or current yields that are published on this report. For more information, please contact your financial professional.

This material was prepared by LPL Financial.
Securities and advisory services offered through LPL Financial (LPL), a registered investment adviser and broker-dealer (member FINRA/SIPC). Insurance products are offered through LPL or its licensed affiliates. To the extent you are receiving investment advice from a separately registered independent investment adviser that is not an LPL Financial affiliate, please note LPL Financial makes no representation with respect to such entity.
- Not Insured by FDIC/NCUA or Any Other Government Agency - Not Bank/Credit Union Guaranteed - Not Bank/Credit Union Deposits or Obligations - May Lose Value

LPL "Official" Statements: This is not an official LPL Financial ("LPL") statement, it has been prepared by your financial professional for informational purposes only, and does not replace the statements you should receive directly either from LPL or from the investment sponsors for which LPL is the broker-dealer of record or any other outside custodian. It is intended to estimate the total value of your investments for which you receive such statements, as well as any investments held away from LPL about which you have provided to your financial professional information from which values can be estimated. This report has been prepared from data believed to be reliable but no representation is being made as to its accuracy or completeness.
The report includes securities held in your LPL account(s) or that LPL does not hold on your behalf and which are not included on LPL's books and records. These outside positions are securities held directly by an outside sponsor rather than in an LPL account. There may be differences in the way each outside securities position is reflected based on the various data sources used. If available, market value may be reflected for these outside positions. Performance may not be calculated for all outside securities positions. Information regarding outside securities positions may be limited because it is provided by a third party source.

The combined total Market Value represents the combination of various sources and types of accounts. This combined total is subject to any error of any of the types of data sources that may be contributing to it, including manual entry errors and data reliability or completeness errors. Values shown should only be used as a general guide to portfolio value, and may vary from the actual liquidation values. Accounts held away from LPL are not covered by LPL's SIPC insurance. The LPL Financial SIPC Membership provides account protection only to those assets held at LPL. To the extent some of the other entities may be SIPC members, please contact your financial professional or the other entity or refer to the other entity's statement regarding SIPC membership. Position values, size of positions, and dates, may be estimates made by your financial professional based on information you have provided. The information contained in this report should not be relied upon for tax reporting purposes, accounting, or valuation purposes. The source of all price information for tracked positions is one or more third party vendors and may include the use of substitute prices where prices are not readily available.

Past performance is no guarantee of future results. Current values may be lower or higher than the values shown. We urge you to compare the information (e.g. market values, transactions, inflows, outflows, and fees) in this report with the information provided in the account statements you receive directly LPL Financial, the investment sponsor, or custodian of the assets. If you are not receiving statements from your custodian, please contact your custodian directly or call LPL Financial at 800-877-7210 extension 6422.

Dynamic Reporting: Unlike your monthly statement, this Report is generated for you by your financial professional on an on-demand basis. This could mean that events not captured on your last monthly statement may be reflected on this report and therefore values on the two documents may not match. Whereas a monthly statement is a static documents, this Report incorporates retroactive adjustments which are routinely posted to your account(s). An example of a routine, retroactive adjustment is dividend payments. Dividends you earn at the end of the month may not be posted to your account until several days into the subsequent month. Such dividends would not be reflected in the value of your monthly statement as those dividends would not have been paid into the account at the time your statement was created. This Report run sometime after the dividends are posted to your account would reflect the value of those dividends at the end of the month.

Performance Calculations: Performance return figures are expressed as a percentage and include the impact of the deduction of any advisory fees and transaction charges. Unless otherwise stated, performance returns are cumulative. Three different methods, time-weighted (TWR), money-weighted (IRR) and return-on-investment (ROI) are displayed on reports. The Advisory Performance Report, uses a time-weighted return. The remaining performance reports use a time-weighted return, money-weighted return or return-on-investment. The return method used on these reports is clearly labeled and can be configured by your financial professional. The time-weighted method is used to depict an account's relative rate of return, is not sensitive to contributions and withdrawals into and out of the account, and, as compared to the money-weighted method, allows clients to better compare performance against other money managers. The money-weighted return method is used to depict an account's personal rate of return, accounts for all contributions and withdrawals into and out of the account, and, as compared to the time-weighted method, better represents the client's actual investment experience during the evaluation period. When compared to the other options, return-on-investment is focused more on accounting and less on performance analysis. ROI is simply your net gain/loss (aka net change aka investment returns) expressed as a percentage of total money invested. Below is an example to clarify the difference of these three methods:

Example: Two investors begin by buying 100 shares at the end of the year's price (\$10), starting off with \$1,000. The first investor makes two subsequent purchases of 100 shares each, one at the end of May (\$14) and the other at the end of August (\$15). The second investor also makes two additional purchases of 100 shares each, but hers are at the end of April (\$8) and September (\$9). The price of the security at the end of the year is \$11, meaning the security is up 10%. The first investor shows a loss of \$600, while the second shows a gain of \$600. The time-weighted return for each investor is +10%. The money-weighted return for the first investor is -24.81% and the second investor is +35.04%. In this case, return-on-investment is -15.38% for the first investor and +22.22% for the second.

	Investor 1	Investor 2
	Dec: 100 Shares @ \$10/s	Dec: 100 Shares @ \$10/s
	May: 100 Shares @ \$14/s	Apr: 100 Shares @ \$8/s
	Aug: 100 Shares @ \$15/s	Sep: 100 Shares @ \$9/s

	Aug: 100 Shares @ \$15/s	Sept: 100 Shares @ \$9/s
Net Invested	\$3,900.00	\$2,700.00
Ending Value	\$3,300.00	\$3,300.00
Net Change	-\$600.00	\$600.00
	Investor 1 Returns	Investor 2 Returns
Time Weighted (TWR)	10.00%	10.00%
Money Weighted (IRR)	-24.81%	35.04%
Return on Investment (ROI)	-15.38%	22.22%

If performance cannot be calculated for a period within the report timeframe, graphs will display a flat line and returns will display "N/A" or "-". For third party advisory programs (TMP), and outside custodians (CST), the above-noted performance calculations may differ from the methodologies used at the current or prior firm or custodian.

Fee-based Accounts: The figures for these accounts reflect the deduction of investment advisory fees. If the investment is being managed through a fee-based account or agreement, the returns are reduced by those applicable advisory fees. Refer to your Advisor's Form ADV, Part II for more information.

Outside Positions: Outside positions are securities held directly by an outside sponsor rather than in an LPL account. They include positions held in accounts identified in the "Location" column with a term other than "LPL." There may be differences in the way each outside position is reflected based on these various data sources used. If available, market value may be reflected for these outside positions. Performance may not be calculated for all outside positions. Information regarding outside positions may be limited because it is provided by a third party source.

Standard Benchmarks: Indices and benchmarks are unmanaged and cannot be invested into directly. For additional information regarding the indices that may be displayed, please contact your financial professional. Benchmark returns may not correspond exactly to the benchmark returns displayed on LPL advisory performance reports or statements.

If returns shown in a report are calculated according to the time-weighted method, returns for the benchmark will be shown based on the simple method. The simple method tracks the return of the benchmark during the reporting period without regard to the timing and value of any additions or withdrawals from your account.

If returns shown in a report are calculated according to the money-weighted method, returns for the benchmark may be shown either based on the simple method or the money-weighted method. A money-weighted benchmark return generally seeks to represent how a hypothetical investment in the benchmark would have performed based on the cash flows in your account. Because money-weighted benchmarks are based on the cash flows in your account, the benchmark returns shown in the report are not likely to be comparable to the published returns for the same benchmark.

Income: Projected income totals shown are estimated and are rounded to the nearest dollar. Total values may reflect rounding discrepancies. If information is not available to calculate income on certain securities, those income generating securities will not be displayed on the report.

Money Market Funds: Money market fund investments are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the funds seek to preserve a value of \$1.00 per share, it is possible to lose money in money market funds.

Est. Income -Estimated Annual Income (EAI): For positions with annual dividends, the Estimated Annual Income is calculated by taking the annual dividend and multiplying by the number of shares owned. If dividends are more or less frequent, the dividend rate is multiplied by the frequency of the dividend and the number of shares owned. If no rate is available, no EAI numbers will be generated. EAI for certain types of securities could include a return of principal or capital gains in which case the EAI would be overstated. EAI is an estimate and the actual income and yield might be lower or higher than the estimated amounts. Additionally the actual dividend or yield may vary depending on the security issuers' approval of paying the dividends. **Yield On Cost:** is your annual estimated income expressed a percentage of the cost of your investment. This metric can show you how efficiently your investments are earning income based on your purchase price and when compared to current-yield can often showcase the growth in income payments over time. Yield on cost cannot be used to compare with the yield of an investment alternative's stated yield. For such a comparison, refer to your investment's current yield.

Holdings Sources: Positions held in your LPL account(s) are indicated with "LPL". The terms "Outside", "CST", "TMP" or a "sponsor's name" refer to securities held or by an investment sponsor or custodian that has agreed to electronically provide information to LPL about your holdings. The source of all price information for these tracked positions is one or more third party vendors and may include the use of substitute prices for prices that are not readily available. For certain securities such as illiquid securities, pink sheet stocks, bulletin board stocks, and fixed income positions, substitute prices used in calculating performance and displayed on the report maybe prices based on trades occurring prior to the date of the missing prices. The source of all quantity information for these holdings is LPL, the prior custodian or the investment sponsor carrying your account. "TMP" represents accounts managed by an investment firm other than LPL as part of a third party advisory program. TMP accounts are held away from LPL and are not covered by LPL's SIPC Insurance. For TMP accounts, LPL's role is limited to a referral to the third party investment firm and LPL do not serve as broker-dealer. TMP accounts have not been verified by LPL. The source of all price information is the third party investment firm, a custodian or a third party vendor. "CST" represents accounts held by an outside custodian and not held or a third party vendor. "CST" represents accounts held by an outside custodian and not held or verified by LPL nor covered by LPL's SIPC Insurance. LPL is not an investment adviser or broker dealer to CST accounts and is not responsible for the holdings or management of the CST account. The source of all price information is the custodian or a third party vendor. In addition, data from "Outside", "sponsor's name", "CST" and "TMP" accounts may also display historical data. Please

be aware that you have the obligation to verify the accuracy of third party advisory programs (TMP), outside custodians (CST) through reliable written documents from the custodian holding the assets. "U" represents "Unofficial Accounts" which may contain both "tracked" and "non-tracked" positions. Tracked positions are assets not held or verified by LPL nor covered by LPL's SIPC Insurance, for which you have supplied the quantity information to your financial professional, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your financial professional. The source of all price information for these tracked positions is one or more third party vendors and may include the use of substitute prices as noted above. Non-tracked positions are assets not held or verified by LPL, for which you have supplied the price and quantity information to your financial professional, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your financial professional. LPL makes no representation or warranty as to the accuracy of the information concerning these Unofficial Accounts and non-tracked and tracked positions. Performance is not calculated in Performance Reports for Unofficial Accounts (either tracked or non-tracked assets).

Pre-June 2000 Data Not Available for Performance: Performance for LPL accounts is not available at the account, position, asset class, or security level prior to June 2000. Generally, performance for assets held directly with the sponsor is not available prior to May of 2010.

Portfolio Manager Report Disclosures

This is not an official LPL Financial ("LPL") statement and does not replace the statements you should receive directly from LPL or an investment sponsor. We urge you to compare the information (e.g., market values, transactions, inflows, outflows and fees) in this report with the information provided in the account statements you receive directly from LPL or the investment sponsor or custodian of the assets. This report has been prepared by your Financial Advisor for informational purposes only and is based on information provided by you, the investment sponsor, custodian of your assets, or what LPL has on its books and records. No representation is being made as to its accuracy or completeness. Position values shown may be actual values or estimates made by your Financial Advisor. Values shown should only be used as a general guide to position value and may vary from the actual liquidation value. Values shown may be as of a date prior to the date of the report. The information contained in this report should not be relied upon for tax reporting purposes. If a price is missing for a certain date, the report may use a substitute price from within the 30 days prior to the missing price date. Past performance is no guarantee of future results. Current performance may be lower or higher than the performance shown. Please contact your Financial Advisor to obtain performance current to the most recent month. If you have any questions, please contact your Financial Advisor at (800) 519-4015. (01/19)

Performance Calculations Performance return figures are expressed as a percentage and include the impact of the deduction of any advisory fees and transaction charges. Unless otherwise stated, performance returns are cumulative. Two different methods, time-weighted and money-weighted, are displayed on reports. The Advisory Performance Report uses a time-weighted return. The remaining reports use either a time-weighted or money-weighted return. The return method used on these reports is clearly labeled and can be configured by your Financial Advisor. The time-weighted method is used to depict an account's relative rate of return, is not sensitive to contributions and withdrawals into and out of the account, and, as compared to the money-weighted method, allows clients to better compare performance against other money managers. The money-weighted return method is used to depict an account's personal rate of return, accounts for all contributions and withdrawals into and out of the account, and, as compared to the time-weighted method, better represents the client's actual investment experience during the evaluation period. On your performance reports, money-weighted returns are denoted with IRR while time-weighted returns are denoted with TWR. Below is an example to clarify the difference of these two methods:

Example: Two investors begin by buying 100 shares at the end of the years' price (\$10), starting off with \$1,000. The first investor makes two subsequent purchases of 100 shares each, one at the end of May (\$14) and the other at the end of August (\$15). The second investor also makes two additional purchases of 100 shares each, but hers are at the end of April (\$8) and September (\$9). The price of the security at the end of the year is \$11, meaning the security is up 10%. The first investor shows a loss of \$600, while the second shows a gain of \$600. The time-weighted return for each investor is 10%. The money-weighted return for the first investor is -24.86% and the second investor is +35.16%.

	Investor 1	Investor 2
	Dec: 100 Shares @ \$10/s	Dec: 100 Shares @ \$10/s
	May: 100 Shares @ \$14/s	Apr: 100 Shares @ \$8/s
	Aug: 100 Shares @15/s	Sept: 100 Shares @9/s
Net Invested	\$3,900.00	\$2,700.00
Ending Value	\$3,300.00	\$3,300.00
Net Change	-\$600.00	\$600.00
Time Weighted (TWR)	10.00%	10.00%
Money Weighted (IRR)	-24.86%	35.16%

If performance cannot be calculated for a period within the report timeframe, graphs will display a flat line and returns will display "N/A" or "---". For third party advisory programs (TMP), and outside custodians (CST), the above-noted performance calculations may differ from the methodologies used at the current or prior firm or custodian.

Purchase Date Purchase date reflects the earliest purchase date for any portion of the position. Additional purchases may have been made after the initial purchase.

Special Note about Certain Performance Reports For the Comparative Analysis Report, only positions that were held at the Start Date and/or at the End Date will be shown; however, positions held in the account after the Start Date and sold prior to the End Date will be reflected in the performance figures shown on the report. For the Portfolio Appraisal Reports, only securities held at the End Date will be shown; however, positions held in the account on or after the Start Date and sold prior to the End Date will be reflected in the performance figures shown on the report.

Location Columns The terms used under the column with the heading "Loc," which include "LPL", "CST", "TMP," and "U" refer to securities held in your LPL account(s) or by an investment sponsor that has agreed to electronically provide information to LPL about your holdings.

"LPL" represents accounts with assets maintained at LPL.

"CST" represents accounts held by an outside custodian that are not held or verified by LPL nor covered by LPL's SIPC Insurance. LPL is not an investment advisor or broker-dealer to CST accounts and is not responsible for the holdings or management of the CST account. The source of all price information is the custodian or a third party vendor.

"TMP" represents accounts managed by an investment firm other than LPL as part of a third party advisory program. TMP accounts are held away from LPL and are not covered by LPL's SIPC

Insurance. For TMP accounts, LPL's role is limited to a referral to the third party investment firm and LPL does not serve as broker-dealer. TMP accounts have not been verified by LPL. The source of all price information is the third party investment firm, a custodian or a third party vendor.

Please be aware that you have the obligation to verify the accuracy of data for outside accounts, including CST, and TMP accounts, through confirmations, statements and other correspondence and documents you receive from the custodian holding the assets.

"U" represents "Unofficial Accounts" which may contain both "tracked" and "non-tracked" positions. Tracked positions are assets not held or verified by LPL nor covered by LPL's SIPC Insurance, for which you have supplied the quantity information to your Financial Advisor, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your Financial Advisor. The source of all price information for these tracked positions is one or more third party vendors and may include the use of substitute prices as noted above. Non-tracked positions are assets not held or verified by LPL, for which you have supplied the price and quantity information to your Financial Advisor, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your Financial Advisor. LPL makes no representation or warranty as to the accuracy of the information concerning these Unofficial Accounts and non-tracked and tracked positions. Performance is not calculated in Portfolio Manager reports for Unofficial Accounts (either tracked or non-tracked assets).

Personal Assets This report may include personal assets that the firm does not hold on your behalf, and that are not included on the firm's books and records. Personal assets include the following:

- Collectibles (e.g., art, antiques, coins, stamps)
- Real estate (e.g., personal residence, vacation homes, investment property)
- Intangible Assets (e.g., patents, trademarks, copyrights, goodwill)
- Checking and savings accounts
- Business ownership/interests (e.g., equipment, inventory, property, accounts receivables)
- Insurance
- Personal Property (e.g., cars, snowmobiles, etc.)

Information about personal assets is shown as an accommodation to you. The value of personal assets has not been verified by the firm and is included for informational purposes only. You should not use information about personal assets on this report for lending, legal, or tax purposes. You are encouraged to review and maintain any applicable source documents related to personal assets as they may contain notices, disclosures and other important information.

Outside Positions Outside positions are securities held directly by an outside sponsor rather than in an LPL account. They include positions held in accounts identified in the "Loc" column with a term other than "LPL." There may be differences in the way each outside position is reflected based on these various data sources used. If available, market value may be reflected for these outside positions. Performance may not be calculated for all outside positions. Information regarding outside positions may be limited because it is provided by a third party source.

Pre-June 2000 Data Not Available for Performance Performance for LPL accounts is not available at the account, position, asset class, or security level prior to June 2000. Generally, performance for assets held directly with the sponsor is not available prior to May of 2010.

Direct Participation Programs and Alternative Investments Direct participation program securities (e.g. partnerships, limited liability companies, fund of hedge funds, managed futures, and real estate investment trusts that are not listed on a national exchange or NASDAQ) are generally illiquid and you may not be able to liquidate. Securities prices may vary from actual liquidation value and should not be relied upon. The values for these securities generally are provided by the management of the program and represent the management's estimate of the investor's interest in the net assets of the program.

Cost Basis Transactions shown in the reports are automatically paired against holdings on a "First-In/First Out" basis (unless manually adjusted), and for this reason, may not match the cost basis provided in a trade confirmation or statement. In addition, because the cost basis on certain securities may have been provided by a source other than LPL, the cost basis on this report may not reflect accurate data or correspond to data on your trade confirmations. If cost basis is not available, N/A or "----" is used as the cost basis. For any assets purchased in the account, the cost basis is the actual purchase price including transaction charges.

Index and Benchmarks Indices and benchmarks are unmanaged and cannot be invested into directly. For additional information regarding the indices that may be displayed, please contact your Financial Advisor. Benchmark returns may not correspond exactly to the benchmark returns displayed on LPL advisory performance reports or statements.

If returns shown in a report are calculated according to the time-weighted method, returns for the benchmark will be shown based on the simple method. The simple method tracks the return of the benchmark during the reporting period without regard to the timing and value of any additions or withdrawals from your account.

If returns shown in a report are calculated according to the money-weighted method, returns for the benchmark may be shown either based on the simple method or the money-weighted method. A money-weighted benchmark return generally seeks to represent how a hypothetical investment in the benchmark would have performed based on the cash flows in your account. Because money-weighted benchmarks are based on the cash flows in your account, the benchmark returns shown in the report are not likely to be comparable to the published returns for the same benchmark.

LPL Benchmarks The LPL benchmark is calculated using a weighted average of the indices, in the percentages specified as noted above. The LPL benchmark may represent the benchmark for the current investment objective for the account or a benchmark assigned to your account or group of accounts by your Financial Advisor. Please keep in mind that the investment objective for the account may have changed over time.

Income Projected income totals shown are estimated and are rounded to the nearest dollar. Total values may reflect rounding discrepancies. If information is not available to calculate income on certain securities, those income generating securities will not be displayed on the report.

Money Market Funds Money market fund investments are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the funds seek to preserve a value of \$1.00 per share, it is possible to lose money in money market funds.

Securities offered through LPL Financial, Member FINRA/SIPC. Advisory Services offered through LWM Advisory Services, LLC, a Registered Investment Advisor. Legacy Wealth Management and LWM Advisory Services, LLC are separate entities from LPL Financial.

To the extent you are receiving investment advice from a separately registered independent investment advisor, please note that LPL Financial is not an affiliate of and makes no representation with respect to such entity.

Performance results prior to June 2014 reflect the performance of investments held in your account prior to LWM Advisory Services, LLC's management of the account's investments.

Disclaimers

General Disclaimers

² **Missing Price:** One or more investment prices are unavailable. For calculation purposes, investments without a price are assumed to be worthless on the date or dates that the price is missing. This will impact the market values, performance returns and/or current yields that are published on this report. For more information, please contact your financial professional.

This material was prepared by LPL Financial.

Securities and advisory services offered through LPL Financial (LPL), a registered investment adviser and broker-dealer (member FINRA/SIPC). Insurance products are offered through LPL or its licensed affiliates. To the extent you are receiving investment advice from a separately registered independent investment adviser that is not an LPL Financial affiliate, please note LPL Financial makes no representation with respect to such entity.

- Not Insured by FDIC/NCUA or Any Other Government Agency - Not Bank/Credit Union Guaranteed - Not Bank/Credit Union Deposits or Obligations - May Lose Value

LPL "Official" Statements: This is not an official LPL Financial ("LPL") statement, it has been prepared by your financial professional for informational purposes only, and does not replace the statements you should receive directly either from LPL or from the investment sponsors for which LPL is the broker-dealer of record or any other outside custodian. It is intended to estimate the total value of your investments for which you receive such statements, as well as any investments held away from LPL about which you have provided to your financial professional information from which values can be estimated. This report has been prepared from data believed to be reliable but no representation is being made as to its accuracy or completeness.

The report includes securities held in your LPL account(s) or that LPL does not hold on your behalf and which are not included on LPL's books and records. These outside positions are securities held directly by an outside sponsor rather than in an LPL account. There may be differences in the way each outside securities position is reflected based on the various data sources used. If available, market value may be reflected for these outside positions. Performance may not be calculated for all outside securities positions. Information regarding outside securities positions may be limited because it is provided by a third party source.

The combined total Market Value represents the combination of various sources and types of accounts. This combined total is subject to any error of any of the types of data sources that may be contributing to it, including manual entry errors and data reliability or completeness errors. Values shown should only be used as a general guide to portfolio value, and may vary from the actual liquidation values. Accounts held away from LPL are not covered by LPL's SIPC insurance. The LPL Financial SIPC Membership provides account protection only to those assets held at LPL. To the extent some of the other entities may be SIPC members, please contact your financial professional or the other entity or refer to the other entity's statement regarding SIPC membership. Position values, size of positions, and dates, may be estimates made by your financial professional based on information you have provided. The information contained in this report should not be relied upon for tax reporting purposes, accounting, or valuation purposes. The source of all price information for tracked positions is one or more third party vendors and may include the use of substitute prices where prices are not readily available.

Past performance is no guarantee of future results. Current values may be lower or higher than the values shown. We urge you to compare the information (e.g. market values, transactions, inflows, outflows, and fees) in this report with the information provided in the account statements you receive directly LPL Financial, the investment sponsor, or custodian of the assets. If you are not receiving statements from your custodian, please contact your custodian directly or call LPL Financial at 800-877-7210 extension 6422.

Dynamic Reporting: Unlike your monthly statement, this Report is generated for you by your financial professional on an on-demand basis. This could mean that events not captured on your last monthly statement may be reflected on this report and therefore values on the two documents may not match. Whereas a monthly statement is a static documents, this Report incorporates retroactive adjustments which are routinely posted to your account(s). An example of a routine, retroactive adjustment is dividend payments. Dividends you earn at the end of the month may not be posted to your account until several days into the subsequent month. Such dividends would not be reflected in the value of your monthly statement as those dividends would not have been paid into the account at the time your statement was created. This Report run sometime after the dividends are posted to your account would reflect the value of those dividends at the end of the month.

Fee-based Accounts: The figures for these accounts reflect the deduction of investment advisory fees. If the investment is being managed through a fee-based account or agreement, the returns are reduced by those applicable advisory fees. Refer to your Advisor's Form ADV, Part II for more information.

Outside Positions: Outside positions are securities held directly by an outside sponsor rather than in an LPL account. They include positions held in accounts identified in the "Location" column with a term other than "LPL." There may be differences in the way each outside position is reflected based on these various data sources used. If available, market value may be reflected for these outside positions. Performance may not be calculated for all outside positions. Information regarding outside positions may be limited because it is provided by a third party source.

Money Market Funds: Money market fund investments are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the funds seek to preserve a value of \$1.00 per share, it is possible to lose money in money market funds.

Est. Income -Estimated Annual Income (EAI): For positions with annual dividends, the Estimated Annual Income is calculated by taking the annual dividend and multiplying by the number of shares owned. If dividends are more or less frequent, the dividend rate is multiplied by the frequency of the dividend and the number of shares owned. If no rate is available, no EAI numbers will be generated. EAI for certain types of securities could include a return of principal or capital gains in which case the EAI would be overstated. EAI is an estimate and the actual income and yield might be lower or higher than the estimated amounts. Additionally the actual dividend or yield may vary depending on the security issuers' approval of paying the dividends. **Yield On Cost:** is your annual estimated income expressed a percentage of the cost of your investment. This metric can show you how efficiently your investments are earning income based on your purchase price and when compared to current-yield can often showcase the growth in income payments over time. Yield on cost cannot be used to compare with the yield of an investment alternative's stated yield. For such a comparison, refer to your investment's current yield.

Holdings Sources: Positions held in your LPL account(s) are indicated with "LPL". The terms "Outside", "CST", "TMP" or a "sponsor's name" refer to securities held or by an investment sponsor or custodian that has agreed to electronically provide information to LPL about your holdings. The source of all price information for these tracked positions is one or more third party vendors and may include the use of substitute prices for prices that are not readily available. For certain securities such as illiquid securities, pink sheet stocks, bulletin board stocks, and fixed income positions, substitute prices used in calculating performance and displayed on the report maybe prices based on trades occurring prior to the date of the missing prices. The source of all quantity information for these holdings is LPL, the prior custodian or the investment sponsor carrying your account. "TMP" represents accounts managed by an investment firm other than LPL as part of a third party advisory program. TMP accounts are held away from LPL and are not covered by LPL's SIPC Insurance. For TMP accounts, LPL's role is limited to a referral to the third party investment firm and LPL do not serve as broker-dealer. TMP accounts have not been verified by LPL. The source of all price information is the third party investment firm, a custodian or a third party vendor. "CST" represents accounts held by an outside custodian and not held or a third party vendor. "CST" represents accounts held by an outside custodian and not held or verified by LPL nor covered by LPL's SIPC Insurance. LPL is not an investment adviser or broker dealer to CST accounts and is not responsible for the holdings or management of the CST account. The source of all price information is the custodian or a third party vendor. In addition, data from "Outside", "sponsor's name", "CST" and "TMP" accounts may also display historical data. Please be aware that you have the obligation to verify the accuracy of third party advisory programs (TMP), outside custodians (CST) through reliable written documents from the custodian holding the assets. "U" represents "Unofficial Accounts" which may contain both "tracked" and "non-tracked" positions. Tracked positions are assets not held or verified by LPL nor covered by LPL's SIPC Insurance, for which you have supplied the quantity information to your financial professional, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your financial professional. The source of all price information for these tracked positions is one or more third party vendors and may include the use of substitute prices as noted above. Non-tracked positions are assets not held or verified by LPL, for which you have supplied the price and quantity information to your financial professional, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your financial professional. LPL makes no representation or warranty as to the accuracy of the information concerning these Unofficial Accounts and non-tracked and tracked positions. Performance is not calculated in Performance Reports for Unofficial Accounts (either tracked or non-tracked assets).

Pre-June 2000 Data Not Available for Performance: Performance for LPL accounts is not available at the account, position, asset class, or security level prior to June 2000. Generally, performance for assets held directly with the sponsor is not available prior to May of 2010.

Disclosure

Advisory services offered through LWM Advisory Services, LLC. Securities offered through LPL Financial, member FINRA/SIPC. LPL Financial, LWM Advisory Services, LLC and Legacy Wealth Management are affiliated companies. Values are as of 05/04/2021 unless otherwise noted. **This is not an official LPL Financial ("LPL") statement; it has been prepared by your Advisor for informational purposes only, and does not replace the statements you should receive directly either from LPL or from the investment sponsors for which LPL is the broker-dealer of record or any other outside custodian.** It is intended to estimate the total value of your investments for which you receive such statements, as well as any investments held away from LPL about which you have provided to your Advisor information from which values can be estimated. This report has been prepared from data believed to be reliable but no representation is being made as to its accuracy or completeness.

The report includes securities held in your LPL account(s) or that LPL does not hold on your behalf and which are not included on LPL's books and records. These outside positions are securities held directly by an outside sponsor rather than in an LPL account. There may be differences in the way each outside securities position is reflected based on the various data sources used. If available, market value may be reflected for these outside positions. Performance may not be calculated for all outside securities positions. Information regarding outside securities positions may be limited because it is provided by a third party source.

Values shown should only be used as a general guide to portfolio value, and may vary from the actual liquidation values. Accounts held away from LPL are not covered by LPL's SIPC Insurance. The LPL Financial SIPC Membership provides account protection only to those assets held at LPL. To the extent some of the other entities may be SIPC members, please contact your financial advisor or the other entity or refer to the other entity's statement regarding SIPC membership. Position values, size of positions, and dates, may be estimates made by your Advisor based on information you have provided. The information contained in this report should not be relied upon for tax reporting purposes, accounting, or valuation purposes. The source of all price information for tracked positions is one or more third party vendors and may include the use of substitute prices where prices are not readily available.

Past performance is no guarantee of future results. Current values may be lower or higher than the values shown. We urge you to compare the information (e.g. market values, transactions, inflows, out flows, and fees) in this report with the information provided in the account statements you receive directly from LPL Financial, the investment sponsor, or custodian of the assets. If you are not receiving statements from your custodian, please contact your custodian directly or call LPL Financial at 800-558-7567.

For fee-based accounts only: The figures may or may not reflect the deduction of investment advisory fees. If the investment is being managed through a fee-based account or agreement, the returns may be reduced by those applicable advisory fees. Refer to your Advisor's Form ADV, Part II.

The Cost Basis information is subject to the validity of the supplier of cost basis information and should not be used for tax purposes. Please refer to your original statements and/or confirms.

For assets not purchased in the LPL account, you or the previous broker/dealer upon transfer may have provided the date acquired and purchase cost of the position. If no such data was submitted, N/A may be listed as the purchase Cost. N/A displays when investment information is incomplete and may be treated as zero when calculating Gain or Loss totals. Since the date acquired and the purchase cost on certain securities may have been provided by another source, this information may not reflect accurate data or correspond to data on your trade confirmations. This report may use one of the following accounting methods: First In, First Out (FIFO); Last In, First Out (LIFO); Average Cost, or Average Cost Long Term. For information on the method used, please contact your advisor.

Designating liquidations as "versus payment" date on a trade confirmation will not adjust the cost basis information on your statement or in this report. If this report includes outside accounts, manual accounts, or groups of accounts, detailed descriptions of terminology and calculations used in this report can be obtained by requesting information from your advisor.

The Modified Dietz formula is used as an approximation to the true, money-weighted rate-of-return (MWRR) or internal rate of return (IRR). The portfolio or asset is valued at the starting and ending points of the period. Cash flows are included in the calculation based on their timing (i.e., when they occurred during the period). The Modified Dietz will yield a result which approximates the IRR, which is the true, money-weighted rate-of-return. If the cash flows and returns are large, then the ability for the Modified Dietz to approximate the IRR is diminished. Otherwise, the Modified Dietz serves as an acceptable approximation to the IRR.

Positions on this statement may include assets that are not held or verified by LPL, for which you have supplied the price and quantity information to your LPL representative, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your LPL representative.

This report may include personal assets that the firm does not hold on your behalf, and that are not included on the firm's books and records. Personal assets include the following:

Collectibles (e.g., art, antiques, coins, stamps)

Introduction - Statement of Purpose

This Investment Policy Statement (IPS) is intended to provide a clear understanding between the Florida West Coast Operating Engineers Apprenticeship Trust Fund, LWM Advisory Services, LLC., Advisor and Tony DuBose, Investment Advisor Representative regarding the objectives, goals, and guidelines established by the trustees for the investment of assets.

This IPS is not a contract. It is intended to assist the trustees and Advisor in effectively supervising, monitoring and evaluating the management of the trust assets. These policies will be reviewed and/or revised as necessary to reflect any changes related to the portfolio, the trustees, or the markets. There is no assurance that the goals and objectives outlined herein will be achieved.

The trustees shall promptly notify the Advisor of any changes in the investment situation.

The trustees recognize and acknowledge that risk must be assumed in order to achieve the long-term investment objectives and that there are uncertainties and complexities associated with investment markets.

The trustees understand that achievement of the trust goals and objectives are measured against long-term objectives and not against short-term market fluctuations.

1. Investment Goals

a. Risk and Time Horizon

*Investments to be focused on income, low risk Capital Preservation-oriented investments.
Time horizon (5-10 Years)*

b. Liquidity Constraints

Immediate or near-term cash requirements may create the need for more liquid assets despite the overall long-term objectives. Trustees have the following liquidity constraint(s):

Spending Policy

The forward annual projected distribution need = _____. This amount is based upon discussions with the trustees of the portfolio.

c. Tax Consequences/ Non-Qualified Accounts

Legacy Wealth Management and Tony DuBose do not provide tax advice. However, during the asset management process, as information is available to the Adviser, the following tax considerations communicated by Client will be observed:

Non-Profit, Not Applicable

2. Investment Objectives

The primary investment objective of the assets placed under management is *Income with Capital Preservation*, (Conservative), although the trustees acknowledge that past performance does not guarantee future results, this portfolio should be constructed to satisfy diversification and asset allocation strategies and designed to meet the goals and objectives over time.

The nature of the investment objective reflects the trust risk tolerance, time horizon and goals, and can be described as follows:

Income with Capital Preservation (Fixed Income)

- *Investors in this portfolio should have a time horizon of more than five years and be comfortable with the volatility that will occur with changing interest rates and credit risk.*
- *Emphasis is placed on generation of current income and prevention of capital loss.*
- *The primary investment objective of this portfolio is to generate income and preserve capital.*
- *A minimum of 30 % of fixed income investments are allocated to high quality U.S. Non-Corporate Bonds credit quality as rated by S&P of AA+. A maximum of 50 % of the portfolio assets may be invested in Investment Grade Corporate Bonds as rated by S&P with a credit quality of BBB or better. A maximum of 5 % of the portfolio may be invested in fixed income securities with credit quality of below investment grade as rated by S&P.*

3. Investment Guidelines

a. Asset Mix

Although there is no guarantee of success, investments in the portfolio will be prudently diversified using asset allocation methodology.

100 % US Fixed Income and cash

b. Permissible Investments

The assets under management shall be invested in a manner that is consistent with the client's goals and objectives.

Client agrees to use the following security classifications:

- **FDIC Insured Bank Certificate of Deposits**
- **Individual Debt Instruments: United States Government Obligations, agencies of the United States Government (i.e., US Treasuries, Treasury Inflation Bonds (TIPS),**

debt instrument issued by Ginnie Mae, Fannie Mae, Freddie Mac, Federal Home Loan Bank, Federal Farm Credit Bank and Federal Home Loan Mortgage Corp).

- *Investment Grade Corporate Bonds issued by US Corporations with credit quality of BBB- or better as rated by S&P. 50 % Maximum 5 % to any one issuer.*
- *Cash Reserves: Interest bearing securities, free from risk of loss, price fluctuation and instantly saleable. Shall consist of individual fixed income securities such as Certificates of Deposit, U.S. Treasury Bills, and other similar instruments with less than one year to maturity and/or money market funds (Non-Corporate).*

c. Prohibited Investments and Transactions

Client designates the following as prohibited transactions in the account:

- *The following investments shall not be included in the account:*

Foreign Bonds may not be utilized.

Equities may not be utilized

REITS, Managed Futures, and Hedge Funds are not be utilized.

4. Investment Review

a. Performance measurement

Client represents that the following benchmark reflects investment parameters against which portfolio performance shall be compared on a regular basis:

50-% Lehman Government Credit Index 1-3 Years

50-% S&P/Citigroup US Broad Investment Grade Index

Factors influencing performance deviations will be described by the Advisor in quarterly reports to the Client.

5. Modification of Investment Policy Statement

a. Advisor/Client Meetings

Advisor and Client will meet as required to review the portfolio and investment results in the context of this Investment Policy Statement.

Factors affecting the asset management process, including the economy and interest rates, will also be discussed.

b. Modifications

Any modifications to the Investment Policy Statement shall be promptly documented and disseminated to all affected parties.

Past Modification Dates:

C. Defining S & P Credit Ratings

'AAA'—Extremely strong capacity to meet financial commitments. Highest Rating.

'AA'—Very strong capacity to meet financial commitments.

'A'—Strong capacity to meet financial commitments, but somewhat susceptible to adverse economic conditions and changes in circumstances.

'BBB'—Adequate capacity to meet financial commitments, but more subject to adverse economic conditions.

'BBB-'—Considered lowest investment grade by market participants.

'BB+'—Considered highest speculative grade by market participants.

'BB'—Less vulnerable in the near-term but faces major ongoing uncertainties to adverse business, financial and economic conditions.

'B'—More vulnerable to adverse business, financial and economic conditions but currently has the capacity to meet financial commitments.

'CCC'—Currently vulnerable and dependent on favorable business, financial and economic conditions to meet financial commitments.

'CC'—Currently highly vulnerable.

'C'—Currently highly vulnerable obligations and other defined circumstances.

'D'—Payment default on financial commitments.

Note: Ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

This Investment Policy Statement has been reviewed and accepted by the trustees of the Trust and Adviser.
