Tactical Asset Allocation Guide

Outlook Brightens as Iran Offramp Emerges

The LPL Strategic & Tactical Asset Allocation Committee (STAAC) determines the firm's investment outlook and asset allocation that helps define LPL Research's investment models and overall strategic and tactical investment thinking and guidance. The committee is chaired by the chief investment officer and includes investment specialists from multiple investment disciplines and areas of focus. The STAAC meets weekly to closely monitor all global economic and capital markets conditions to ensure that all the latest information is being digested and incorporated into its investment thought.

Source: STAAC as of April 1, 2026. All sector and asset allocation recommendations must be considered in the context of an individual investor's goals, time horizon, liquidity needs and risk tolerance. Not all recommendations will be in the best interest of all investors. The STAAC views expressed are based on a Tactical Asset Allocation (TAA) for a portfolio that has a Growth With Income (GWI) investment objective.

Investment Takeaways

U.S. equities closed lower in March, sealing a quarterly loss amid broad-based selling as markets navigated the U.S.-Iran geopolitical conflict. The de facto closure of the Strait of Hormuz kindled energy-driven inflation and economic growth worries, as well as supply disruption fears, fueling to a notable uptick in cross-asset volatility. Although, domestic stocks displayed some relative resilience with the S&P 500 remaining only modestly below record levels for much of the month. On the earnings front, data center hyperscaler Oracle (ORCL) topped estimates and posted continued other comprehensive income growth, while in consumer names Target (TGT) beat earnings estimates and offset weaker traffic in the fourth quarter with healthy guidance. Entering April, attention turned to potential paths to ending the U.S.-Iran conflict.

Core bonds also faced downside pressure last month, measured by a 1.3% loss in the Bloomberg U.S. Aggregate Index. Treasury yields rallied alongside crude prices as markets pared back expectations of Federal Reserve (Fed) rate cuts this year, while weak auctions of multiple tenors accelerated an awakening in rate volatility. These dynamics drove some spread widening in the corporate space, while private credit returned to the headlines on additional withdrawal restrictions. However, structural risks remain limited. Mortgage-backed securities outperformed slightly last month.

Looking ahead, an off ramp has started to emerge in Iran with the two-week ceasefire agreement struck on April 8. While the stock market's resilient track record during geopolitical events is reassuring, leaving STAAC to look for opportunities to potentially add equities, investors may be well served by continuing to brace for bouts of volatility. LPL Research continues to expect mid-to-high single digit returns for the S&P 500 in 2026, as discussed in [Outlook 2026: The Policy Engine](#).

Underpinning the outlook is an economy still growing above trend, though surging oil prices and damaged infrastructure in the Persian Gulf have increased the risk of a near-term slowdown in growth. Tailwinds to growth are expected to come from higher-

2026 MARKET FORECASTS

S&P 500 Tracking Above Bull Case Scenario

	Current
10-Year U.S. Treasury Yield	3.75% to 4.25%*
S&P 500 Index Earnings per Share	\$290
S&P 500 Index Fair Value	7,350**

Source: LPL Research, FactSet, Bloomberg
All indexes are unmanaged and cannot be invested into directly.

*Our 2026 year-end target for the 10-year Treasury yield is based on further Fed rate cuts but also a steepening yield curve due to ongoing concerns about sticky inflation and Federal debt/deficits.

**Our year-end 2026 fair-value target range for the S&P 500 is 7,300–7,400, based on a price-to-earnings ratio (PE) of 23 and our S&P 500 earnings per share (EPS) forecast of \$320 in 2027.

Any forward-looking statements including economic forecasts may not develop as predicted and are subject to change.

All data, views, and forecasts herein are as of 04/01/26.

than-expected tax refunds, business tax incentives, and clarity on trade policy. Risks to the outlook include further spikes in oil from the Iran conflict, sticky inflation, a softening job market, and potential business disruption from AI. For fixed income, we expect yields to remain rangebound, although high oil prices may delay Fed rate cuts until later in the year.

The STAAC's recommended tactical asset allocation includes:

- A neutral stance toward U.S. equities. Watching for an off ramp in Iran that holds, evidence of selling "capitulation," or a resumption of the technical uptrend before considering a potential upgrade.
- The Committee slightly favors growth over value for exposure to AI and compelling earnings growth, but recent value strength is nearing an inflection point that could prove sustainable.
- The Committee favors large caps over small caps, partly due to balance sheet quality as credit markets may tighten further. Massive AI investment favors large caps.
- Positive industrials stance is supported by strong earnings momentum, a favorable technical backdrop, and continued tailwinds from fiscal spending and AI-driven investment.
- The Committee maintains its overweight recommendation on the communication services sector amid a combination of solid growth, reasonable valuations, and supportive technicals.
- The Committee continues to debate technology as a possible upgrade candidate given strong earnings and attractive valuations.
- Within fixed income, the STAAC keeps a neutral allocation to core bonds and shows a slight preference for mortgage-backed securities over investment-grade corporates. The Committee views the risk-reward profile of core sectors such as Treasuries, agency MBS, and high-quality corporates as more attractive than that of the plus sectors.

For investors who have their own benchmarks, we would recommend emphasizing underweights or overweights relative to the individual benchmark at the most similar overall risk level.

Equity benchmark style weights are equally distributed across growth and value. Cap weights are based on the underlying holdings of the domestic benchmark indexes.

Bond benchmark sector allocations are based on a look-through analysis of the major sector components of the Bloomberg US Aggregate Bond Index. The exact percentage mix may fluctuate moderately throughout the year based on the relative market cap weights of each component within the Bloomberg US Aggregate Bond Index. The bond sector allocations in the TAA and benchmark will be updated twice per year, or as necessary, in January and July where the absolute values are subject to change, but the difference between the TAA and benchmark will remain constant (absent any Tactical Asset Allocation changes from the STAAC).

Treasuries include other government related debt. MBS includes other securitized debt.

To better align with STAAC's asset allocation framework, mid caps have been combined with large caps in the TAA. Accounts with distinct mid cap allocations may disaggregate mid caps from the "Large & Mid" exposure shown in the table roughly in-line with relative market cap values: 80% Large Cap 20% Mid Cap. For a more detailed breakdown and explanation, please refer to the Supplemental Mid Cap Reference Guide on page 9.

Equity Asset Classes

Waiting for an Off Ramp in Iran that Holds

The Strategic and Tactical Asset Allocation Committee (STAAC) maintains its benchmark exposure to equities stance. The Iran ceasefire is encouraging but fragile, suggesting investors may be well served by bracing for additional volatility. Still, the stock market's resilient track record during geopolitical events is reassuring, leaving STAAC to look for opportunities to potentially add equities. Evidence of selling "capitulation," or a resumption of the technical uptrend could also get the Committee more interested in adding equities. Lower valuations are notable.

In terms of equity style, the Committee slightly favors growth over value for exposure to AI and compelling earnings growth, but recent value strength is nearing an inflection point and bears watching. On market cap, the Committee favors large caps over small caps, partly due to balance sheet quality as credit markets have tightened and may tighten further. Massive AI investment favors large caps.

Color Key:

● Strong Overweight ● Overweight ● Neutral ● Underweight ● Strong Underweight

	Sector	Overall View	Relative Trend	Rationale
Market Capitalization and Style	Large/Mid Growth	* * * ● *	Negative	Technology-driven earnings strength and reasonable valuations within the growth style are supportive, but recent underperformance of growth stocks on AI disruption fears and geopolitical tensions have left the growth style chart near an inflection point that have shortened its leash. Large cap companies continue to offer a compelling earnings outlook. Watching technicals closely.
	Large/Mid Value	* * ● * *	Positive	Value stocks have garnered support from defensive and cyclical value sectors and energy this year while technical analysis trends are positive. Our reluctance to get more positive on value is driven by our expectation that the AI trade and technology will come back into favor post-Iran conflict. In addition, valuations are no longer supportive of value.
	Small Growth	* * ● * *	Positive	Valuations remain supportive, but economic growth headwinds, elevated market volatility, and delayed Fed rate cuts dampen the near-term outlook. Keys to potential outperformance are a risk-on environment and one not led convincingly by mega-cap tech.
	Small Value	* ● * * *	Negative	Attractive valuations, financial deregulation, robust capital investment, and a more domestic focus are positive. Fed rate cuts likely delayed into the second half are a wildcard and we prefer the balance sheet strength of large caps as volatility ramps up and credit conditions tighten.
Region	United States	* * ● * *	No Trend	AI investment and fiscal stimulus are keys to potential U.S. outperformance in 2026. AI scrutiny remains a concern and Fed rate cuts may be pushed out, but the earnings growth outlook and the U.S. innovation advantage remain. Staying neutral for now while waiting for an off ramp in Iran.
	Developed International	* * ● * *	No Trend	Added deficit/defense spending in Europe, corporate reforms in Japan and attractive valuations are supportive. But U.S. dollar strength may be a near-term drag and U.S. technology underperformance, a key piece of international outperformance, may not continue much longer. For those looking for more non-U.S. exposure after the Middle East calms down, consider EM ex-China.
	Emerging Markets	* * ● * *	Positive	Heading into the Iran war, fundamentals, valuations and technicals were all aligning, moving us closer to an upgrade on AI exposure, strong earnings, attractive valuations, and supportive technicals. But given EM's dependency on Mideast oil and shipping routes, and the strong U.S. dollar, patience is prudent.

Relative trend is an assessment of the intermediate term price trend and performance between various asset classes and sectors. For regions and styles, the relative trends are compared to each other.

Equity Sectors

Sticking With Communication Services and Industrials While Keeping a Close Eye on Technology

STAAC continues to favor the communication (comm) services and industrials sectors. Comm services enjoys a combination of solid growth, reasonable valuations, and supportive technicals, while industrials offer strong earnings momentum and a favorable technical backdrop, while benefiting from fiscal stimulus and AI investment. The technology sector, now trading at a modest 6% premium to the S&P 500 on a forward price-to-earnings ratio basis, has become increasingly attractive given the 40% earnings growth expected in 2026 based on consensus estimates. Another possible candidate for upgrade is healthcare, which should benefit from greater policy clarity, AI adoption, and attractive valuations.

Color Key:

● Strong Overweight ● Overweight ● Neutral ● Underweight ● Strong Underweight

	Sector	Overall View	Relative Trend	S&P Wgt.	Rationale
Cyclical	Basic Materials	* * ● * *	Positive	2.1	Lagged in March (7.1%) on metals weakness despite strength in chemical stocks which are positioned to benefit from their U.S.-based supply chains during the Iran conflict. Fiscal stimulus and the data center buildout are also supportive.
	Consumer Discretionary	* ● * * *	Negative	9.7	Slight underperformer in March (-5.8%) even though higher prices at the pump and rising borrowing costs would be expected to hurt consumer spending. Market may be looking past the conflict to an extent. Elevated valuations and sub-par technicals.
	Financial Services	* * ● * *	No Trend	12.6	After a tough start to 2026, financials outperformed in March but fell 3.7%. Alternative asset managers and other AI-challenged businesses rebounded from private credit concerns. A steep yield curve, bank de-regulation, and reasonable valuations offset by tightening credit markets, slow earnings growth, and lackluster technicals.
	Real Estate	* ● * * *	Negative	2.0	Modest underperformer in March (-6.6%) amid higher interest rates and macro headwinds. Lone area of strength was data center REITs, while cell tower REITs suffered double-digit declines. No clear preference for defensive sectors. Reasonable valuations but little growth.
Sensitive	Communication Services	* * * ● *	No Trend	10.5	Lagged in March (-7.3%) on weakness in Meta (META) on children's social media usage scrutiny. Alphabet (GOOG/L), Disney (DIS), and Paramount Skydance (PSKY) also fell sharply during the month. Sector still offers a solid growth at a reasonable valuation and is a potential leader post-conflict despite mixed technical conditions.
	Energy	* * ● * *	Positive	3.9	Top sector performer in March with a 10.3% jump as WTI Crude surged more than 50% on the military campaign in Iran and subsequent closure of the Strait of Hormuz to tanker traffic. Expect oil and energy stocks to pull back once a path to a sustainable ceasefire materializes and the strait is reopened.
	Industrials	* * * ● *	Positive	9.0	Underperformed in March for first time in 2026 with an 8.5% decline. Areas tied to airlines, aerospace, and housing were particularly challenged but may be poised to rebound strongly post-conflict. Business tax incentives, AI investment, and defense spending are tailwinds.
	Technology	* * ● * *	No Trend	33.4	First month of outperformance since October 2025 (-3.9%). Skepticism about massive AI investment and concerns about business disruption abated. Software disruption is a risk, but strong hardware and chip earnings are hard to ignore. Likely winner post-conflict as valuations have come way down and earnings are growing 40%-plus.
Defensive	Consumer Staples	* * ● * *	Negative	5.1	Lagged in March (-7.7%) despite favorable conditions for defensive sectors. Supercenters exhibited relative strength despite pressure on consumer spending and wholesale margins from high energy prices. Rich valuations. Weak technical trend.
	Healthcare	* * ● * *	No Trend	9.3	Underperformer in March (-8.3%) on weakness in medical device and equipment stocks, while biotech and pharma stocks held up relatively well. Easing policy uncertainty. Attractive valuations. Candidate for upgrade if technicals improve.
	Utilities	* * ● * *	No Trend	2.5	Outperformed in March (-3.4%) despite rising interest rates, spotty demand for defensive income sectors, and weakness in AI power stocks. The potential benefit of lower interest rates post-conflict may be offset by limited economic sensitivity.

Any company names noted herein are for educational purposes only and not an indication of trading intent or a solicitation of their products or services.

Fixed Income

Bad Month for Bond Markets

With the Iran conflict top of mind in March and the subsequent increase in inflation expectations, bond investors voted with their feet and sent Treasury yields, across the curve, higher by 30 to 44 basis points. The move was highest in shorter maturity securities, which has caused the Treasury curve to flatten. Corporate credit spreads however have remained relatively well behaved. The move higher in yields has increased the income opportunities particularly in shorter parts of fixed income markets.

In taxable markets, with yields still elevated, particularly for high-quality sectors within the fixed income universe, (Treasuries, MBS and shorter-maturity corporates) income opportunities remain attractive.

Color Key:

● Strong Overweight ● Overweight ● Neutral ● Underweight ● Strong Underweight

		Low	Med	High		Rationale		
Current Stance	Credit Quality Preference			✓		Recommend an up-in-quality approach in allocating to fixed income sectors. All-in yields for lower quality remain near or below longer-term averages, so we think the risk/reward favors owning core bond sectors over the riskier sectors.		
		Short	Inter.	Long		Rationale		
	Duration Preference		✓			The combination of rising inflation expectations due to the Iran conflict and ongoing AI-related growth uncertainty argues for continued caution in interest-rate exposure. For now, we remain neutral duration relative to benchmarks, waiting for more attractive entry points. We would look for the 10-year Treasury yield to reach the 4.75–5.00% range before reconsidering duration positioning.		
		Neg.	Neut.	Pos.		Rationale		
	Municipal Bond View		✓			The ongoing conflict in Iran pushed global bond yields higher in March, weighing on the national municipal market as well. Since the start of the conflict, AAA municipal yields have risen across the curve by roughly 35–59 basis points. With the drawdown however, valuations have improved meaningfully especially within the intermediate category.		
		Overall View		Overall Trend		Rationale		
Core Sectors	U.S. Treasuries	•	•	●	•	No Trend	Treasury yields increased meaningfully in March on higher inflation concerns due to the ongoing conflict in Iran. Moreover, Fed rate cut expectations continue to get pushed out. That said, the 10-year yield is only slightly higher than our 2026 yearend forecast but would look to a 4.75–5.0% as potentially an attractive entry point. Technically, 10-year yields have surpassed resistance near 4.30%, creating near-term potential upside risk to the 4.50%–4.60% range.	
	Mortgage-Backed Securities	•	•	•	●	•	Positive	Spreads have widened recently but are below longer-term averages. And while near-term momentum of falling interest rate volatility and constrained net supply will likely continue into the first half of the year, already tight spreads and eventually lower mortgage rates, which will increase prepayment risks, potentially cap returns for 2026.
	Investment-Grade Corporates	•	●	•	•	•	No Trend	We recommend an underweight to benchmarks, but we think there is an opportunity to invest in shorter to intermediate maturity corporate securities without taking on elevated levels of interest rate or credit risk. Fundamentals remain solid, but spreads remain tight to historical averages.
	TIPS	•	•	●	•	•	Positive	Inflation expectations have widened recently making the "hurdle" to invest in TIPS (versus nominals) higher. However, all-in yields for TIPS remain attractive, particularly shorter maturity TIPS, and could provide a good hedge against unexpected inflation surprises.
Plus Sectors	Preferred Securities	•	•	●	•	No Trend	Valuations/spreads are back to historical averages, but all-in yields remain attractive for income-oriented investors. Recent Fed stress tests continue to show large, money-center bank fundamentals are generally sound, but the environment favors active management.	
	High-Yield Corporates	•	•	●	•	Positive	Software concerns have pushed tech sector spreads wider, but the broader market remains tight to historical averages. High-yield markets have priced out most risks with spread volatility collapsing. Yields for high-yield bonds are below historical averages, and we think the risk/reward is unattractive for most investors. The quality of the market has improved recently though.	
	Bank Loans	•	•	●	•	Positive	The loan market is highly concentrated in software loans so downgrades and defaults will likely increase if AI risks are real. The Iran conflict has pushed out rate cut expectations and while broader default activity has moderated of late, "higher for longer" could increase repayment risks.	
	Foreign Bonds	•	•	●	•	Negative	Yields have moved higher recently but are still generally lower than U.S. markets, despite ongoing political dysfunction in France and monetary policy normalization in Japan. Currency volatility is a risk. The asset class is more attractive for U.S. dollar hedged investors.	
	EM Debt	•	•	●	•	Positive	Valuations are relatively attractive, but idiosyncratic risks remain, and ongoing trade wars could negatively impact smaller emerging countries.	

Commodities and Currencies

Commodities Rally for an Eighth Straight Month

The Bloomberg Roll Select Commodity Total Return Index — designed to mitigate negative roll yield — rose 9% in March, extending its advance to eight consecutive months. Technically, the index has now cleared resistance off the 2011 highs, leaving 950 as the next resistance hurdle to clear, implying about 7% of potential upside from the March close of 887. Relative performance has also improved, as commodities have completed a multi-year double-bottom breakout versus the S&P 500, suggesting additional scope for outperformance.

Escalating hostilities in Iran, coupled with limited visibility into a U.S. exit strategy or the reopening of the Strait of Hormuz, drove a sharp repricing in energy markets. Brent crude, the global benchmark more directly exposed to supply disruptions, surged 63%, while West Texas Intermediate (WTI) climbed 51%. Refined products followed suit, with gasoline and heating oil posting gains in excess of 50%.

Strength in energy more than offset declines in precious metals. Silver led the retreat, falling 20%, while gold slid 11.6% and failed to attract its typical safe-haven demand. A stronger U.S. dollar, higher yields, diminished expectations for Federal Reserve (Fed) rate cuts, and reports of profit-taking by international central banks all weighed on the yellow metal.

Industrial metals delivered mixed results. Aluminum outperformed, gaining roughly 13%, supported by supply constraints stemming from the effective closure of the Strait of Hormuz and Iranian attacks on key smelting facilities in the region.

Agricultural markets moved broadly higher, led by the softs. Disruptions to fertilizer shipments through the Strait of Hormuz introduced another supply shock at a critical juncture for Northern Hemisphere farmers ahead of spring planting. Concerns around lower crop yields pushed wheat and corn up 4%, while soybeans rallied nearly 9%.

Color Key: ● Positive ● Neutral ● Negative

Sector	Overall View			Overall Trend	Rationale
Energy	.	➡	●	Positive	While oil market's have gone parabolic since the start of the Iran war, they have shown limited signs of slowing down. Brent crude and WTI remain above support from their 2023-2024 highs, with buyers stepping in on dips throughout last month. The forward curve also continues to price in a higher-for-longer regime, a message echoed by implied oil market volatility. Given the significant technical improvements in both absolute and relative trends, we are upgrading our view on the energy sector to positive from neutral.
Precious Metals	.	.	●	Positive	Precious metals underperformed last month as concerns over inflation and higher rates offset safe haven flows. While there was some technical damage amid the pullback, the longer-term bullish backdrop remains intact. Gold has emerged as a pullback opportunity after successfully retesting its 200-day moving average, with momentum indicators also subsequently turning bullish in early April. We also do not believe the bullish fundamental backdrop has changed and maintain our positive view on precious metals.
Industrial Metals	.	.	●	Positive	Industrial metals remain volatile but continue to trend higher. Demand remains supported by surging AI capex, rising global infrastructure spending, and building electrification trends. Underinvestment in production and global trade policy have added to the supply/demand imbalance. Despite some near-term pressure, copper has held its uptrend while momentum builds in aluminum, and steel. We maintain our positive view on industrial metals.
Agriculture (Ag) & Livestock	.	●	.	Neutral	Grains had another strong month, supported largely by fertilizer supply disruptions related to the closure of the Strait of Hormuz. Bullish breakouts developed/extended in cotton, soybeans, wheat, and corn. Livestock futures pared intra-month losses and finished just below resistance off the February highs. We maintain our neutral view on ag & livestock for now and acknowledge the technical backdrop of the space is improving.
U.S. Dollar	.	●	.	Neutral	The U.S. Dollar Index rose 2.4% in March and closed near the upper end of its multi-month consolidation range. Safe haven demand, speculator short-covering, and the recalibration of Fed monetary policy expectations drove the advance. A sustained move above 100.5 would validate a breakout from the range, an outcome we see as increasingly likely given the greenback's longer-term secular uptrend and our technical view for upside potential in yields.

The Bloomberg Commodity Index (BCOM) is made up of 24 exchange-traded futures on physical commodities, representing 22 commodities which are weighted to account for economic significance and market liquidity

Any futures referenced are being presented as a proxy, not as a recommendation. The fast price swings in commodities will result in significant volatility in an investor's holdings. Commodities include increased risks, such as political, economic, and currency instability, and may not be suitable for all investors.

Precious metal investing involves greater fluctuation and potential for losses.
Member FINRA/SIPC

Alternative Investments

Trends Begin to Break Down

Alternative investment strategy performance remains mixed year-to-date, however, all sub-strategies outperformed equity markets during March's sell-off. As measured by the HFRX Equity Hedge Index, long/short equity strategies were the main laggard with a decline of 4.4%, as existing single stock short exposure provided limited benefits. Net equity exposure continues to decline, however, on the short side, we've seen an increase in index-based exposure, not individual shorts. So during a month when concentrated long positions declined by more than their respective sectors and the broader market, the long/short structure suffered. In the trend-following space, the HFRX Systematic Diversified CTA Index declined 3.0%. Losses were largely driven by equity positioning, as many managers entered the month with long exposure across domestic and developed international equities, which detracted from performance as markets weakened amid heightened geopolitical uncertainty related to the Iran conflict. However, as selling increased during the month, many strategies initiated outright short exposure. On the year, the index has increased 4.2%, outperforming the S&P 500 by over 8.0%. The HFRX Event Driven: Merger Arb index loss 1.3%, as spreads widened. The decline was not due to concerns related to deal breaks or regulatory concerns, rather was the result of pressure from the equity market sell-off.

Overall, with economic and policy uncertainty likely to continue into 2026, we remain positive on alternative investment strategies, as we believe they can help strengthen portfolio stability during periods of volatility. Our preferred approaches include equity market-neutral, nimble discretionary global macro, and event-driven strategies.

Color Key: ● Positive ● Neutral ● Negative

	Sector	Overall View			Rationale
Fundamental	Long/Short Equity	.	.	●	While monthly performance was weak, elevated volatility and ongoing stock dispersion should continue to create a favorable environment for low-net, stock-picking strategies. For long-biased long/short equity managers, expanding beyond U.S. markets into regions with supportive policy frameworks may offer more compelling opportunities.
	Event Driven	.	.	●	Mergers and acquisitions (M&A) and initial public offerings (IPO) have improved relative to the low levels of prior years. Distressed debt opportunities remain limited as credit spreads continue to tighten. The M&A and IPO markets have begun to show signs of recovery, expanding the investable universe for merger arbitrage managers which they should benefit from.
Tactical	Global Macro	.	.	●	Agile discretionary macro managers should continue to capitalize on economic and policy shifts, along with intermittent spikes in market volatility. Tactical discretionary macro strategies are well-positioned to capitalize on opportunities emerging from shifting economic conditions, evolving policy landscapes, and elevated market volatility.
	Managed Futures	.	●	.	We continue to favor holding a diversified mix of sub-strategies, including but not limited to, short-term momentum, volatility breakout, pattern recognition, and trend following. Diversification within trend following in terms of markets and time frame is encouraged as well. We remain mindful of the significant long exposure to certain contracts such as oil and gold. In this environment, a broadly diversified allocation across sub-strategies is preferred.
Multi-Strategy	Multi-PM Single Funds	.	.	●	Multi-strategy funds should continue to benefit from the ability to dynamically invest across alternative investment strategies.
	Specialty Strategies	.	●	.	Volatility arbitrage and cross-asset tail risk strategies with minimal carrying cost may be good additional diversifiers in portfolios. Volatility arbitrage and tail risk with reduced/no negative carry can potentially add value to portfolios.

Please see <https://www.hfr.com/indices> for further information on the indices.

Definition: The HFRI 400 (US) Hedge Fund Indices are global, equal-weighted indices comprised of the largest hedge funds that report to the HFR Hedge Fund Research

Supplemental Mid Cap Reference Guide

Rationale for Large and Mid Cap Aggregation

The STAAC's decision to aggregate mid cap equities with large caps is driven by a desire to construct asset allocation models using distinct and efficient building blocks that either a) materially enhance expected returns, or b) materially reduce expected risk relative to our benchmark. We believe that a four-box framework, segmented by size and style, provides the most impactful differentiation for our investment decision making. Additionally, this is most aligned with our investment universe, given most active large cap managers benchmark to the Russell 1000 (which has significant overlap with the Russell Midcap Index, 800 stocks representing approximately 20% of market cap).

We also believe that reducing the number of style boxes improves capital efficiency and lowers trading costs and turnover. By streamlining these classifications, we can avoid such inefficiencies.

Disaggregated U.S. Mid Cap and Large Cap Tactical Asset Allocation as of 01/01/2026

The 80% Large Cap / 20% Mid Cap decomposition provided below is intended as a general reference for advisors who prefer to maintain a distinct mid cap allocation. The exact percentage mix may fluctuate moderately throughout the year based on the relative market cap weights of each component within the Russell 1000. The STAAC's official position is to treat large and mid caps as a combined category within the TAA as shown on page 3. The Supplemental Mid Cap Reference Guide will be updated twice per year, or as necessary, in January and July.

Important Disclosures

This material has been prepared for informational purposes only, and is not intended as specific advice or recommendations for any individual. There is no assurance that the views or strategies discussed are suitable for all investors and they do not take into account the particular needs, investment objectives, tax and financial condition of any specific person. To determine which investment(s) may be appropriate for you, please consult your financial professional prior to investing. Any economic forecasts set forth may not develop as predicted and are subject to change.

Stock investing involves risk including loss of principal. Because of their narrow focus, sector investing will be subject to greater volatility than investing more broadly across many sectors and companies. Value investments can perform differently from the market as a whole and can remain undervalued by the market for long periods of time. The prices of small and mid-cap stocks are generally more volatile than large cap stocks. Bonds are subject to market and interest rate risk if sold prior to maturity.

Asset Class Disclosures

Because of its narrow focus, specialty sector investing, such as healthcare, financials, or energy, will be subject to greater volatility than investing more broadly across many sectors and companies. Relative trend is an assessment of the intermediate term price trend and performance between various asset classes and sectors. For sectors each sector's relative trend is versus the S&P 500.

Yield spread is the difference between yields on differing debt instruments, calculated by deducting the yield of one instrument from another. The higher the yield spread, the greater the difference between the yields offered by each instrument. The spread can be measured between debt instruments of differing maturities, credit ratings, and risk. Bank loans are loans issued by below investment-grade companies for short-term funding purposes with higher yield than short-term debt and involve risk. For the purposes of this publication, intermediate-term bonds have maturities between three and 10 years, and short-term bonds are those with maturities of less than three years.

Bond values will decline as interest rates rise and bonds are subject to availability and change in price. Corporate bonds are considered higher risk than government bonds. Municipal bonds are subject to availability and change in price. Interest income may be subject to the alternative minimum tax. Municipal bonds are federally tax-free but other state and local taxes may apply. If sold prior to maturity, capital gains tax could apply. U.S. Treasuries may be considered "safe haven" investments but do carry some degree of risk including interest rate, credit, and market risk. Bond yields are subject to change. Certain call or special redemption features may exist which could impact yield. Mortgage-backed securities are subject to credit, default, prepayment, extension, market and interest rate risk.

Municipal bonds are subject to availability and change in price. They are subject to market and interest rate risk if sold prior to maturity. Bond values will decline as interest rates rise. Interest income may be subject to the alternative minimum tax. Municipal bonds are federally tax-free but other state and local taxes may apply. If sold prior to maturity, capital gains tax could apply.

High yield/junk bonds (grade BB or below) are not investment grade securities, and are subject to higher interest rate, credit, and liquidity risks than those graded BBB and above. They generally should be part of a diversified portfolio for sophisticated investors.

Floating rate bank loans are loans issued by below investment grade companies for short term funding purposes with higher yield than short term debt and involve risk.

Credit Quality is one of the principal criteria for judging the investment quality of a bond or bond mutual fund. Credit ratings are published rankings based on detailed

financial analyses by a credit bureau specifically as it relates to the bond issue's ability to meet debt obligations. The highest rating is AAA, and the lowest is D. Securities with credit ratings of BBB and above are considered investment grade. Duration is a measure of the sensitivity of the price (the value of principal) of a fixed-income investment to a change in interest rates. It is expressed as a number of years.

Preferred stock dividends are paid at the discretion of the issuing company. Preferred stocks are subject to interest rate and credit risk. As interest rates rise, the price of the preferred falls (and vice versa). They may be subject to a call feature with changing interest rates or credit ratings.

Alternative investments may not be suitable for all investors and should be considered as an investment for the risk capital portion of the investor's portfolio. The strategies employed in the management of alternative investments may accelerate the velocity of potential losses. Alternative investments include non-traditional asset classes. This may include hedge funds, private equity/debt/credit, etc. This may also include Business Development Companies (BCDs) and Opportunity Zone investments. These are not registered securities and there may be significant restrictions on purchase and suitability requirements. Please contact your advisor for any further information.

The HFRX Absolute Return Index is designed to be representative of the overall composition of the hedge fund universe. It is comprised of all eligible hedge fund strategies; including but not limited to convertible arbitrage, distressed securities, equity hedge, equity market neutral, event driven, macro, merger arbitrage, and relative value arbitrage.

The HFRX Equity Hedge Index measures the performance of the hedge fund market. Equity hedge strategies maintain positions both long and short in primarily equity and equity derivative securities.

The HFRI® Indices are broadly constructed indices designed to capture the breadth of hedge fund performance trends across all strategies and regions.

The HFRI Institutional Macro Index is a global, equal-weighted index of hedge funds with minimum assets under management of USD \$500MM which report to the HFR Database and are open to new investments.

Event driven strategies, such as merger arbitrage, consist of buying shares of the target company in a proposed merger and fully or partially hedging the exposure to the acquirer by shorting the stock of the acquiring company or other means. This strategy involves significant risk as events may not occur as planned and disruptions to a planned merger may result in significant loss to a hedged position. Managed futures are speculative, use significant leverage, may carry substantial charges, and should only be considered suitable for the risk capital portion of an investor's portfolio.

Commodity-linked investments may be more volatile and less liquid than the underlying instruments or measures, and their value may be affected by the performance of the overall commodities baskets as well as weather, geopolitical events, and regulatory developments. The fast price swings in commodities and currencies will result in significant volatility in an investor's holdings. Any futures referenced are being presented as a proxy, not as a recommendation. Commodities include increased risks, such as political, economic, and currency instability, and may not be suitable for all investors. Precious metal investing involves greater fluctuation and potential for losses.

Precious metal investing involves greater fluctuation and potential for losses.

Important Disclosures

There is no guarantee that a diversified portfolio will enhance overall returns or outperform a non-diversified portfolio. Diversification does not protect against market risk.

Investing in foreign and emerging markets securities involves special additional risks. These risks include, but are not limited to, currency risk, geopolitical risk, and risk associated with varying accounting standards. Investing in emerging markets may accentuate these risks. All information is believed to be from reliable sources; however, LPL Financial makes no representation as to its completeness or accuracy. Precious metal investing involves greater fluctuation and potential for losses.

Earnings per share (EPS) is the portion of a company's profit allocated to each outstanding share of common stock. EPS serves as an indicator of a company's profitability. Earnings per share is generally considered to be the single most important variable in determining a share's price. It is also a major component used to calculate the price-to-earnings valuation ratio.

Gross Domestic Product (GDP) is the monetary value of all the finished goods and services produced within a country's borders in a specific time period, though GDP is usually calculated on an annual basis. It includes all of private and public consumption, government outlays, investments and exports less imports that occur within a defined territory.

Risk & Return

A graphical look at the historical risk and return of your portfolio and benchmark(s). This chart graphically represents the 3-year annualized risk and return data.

For the returns of fixed income holdings, the asset class respective benchmark is used.

The 3-Month Treasury Bill Index is used to represent the returns of cash and equivalent holdings.

The measure used to represent the risk is the standard deviation of returns.

This is a hypothetical example and is not representative of any specific situation. Your results will vary.

General Disclaimers

This material was prepared by LPL Financial.

Securities and advisory services offered through LPL Financial (LPL), a registered investment adviser and broker-dealer (member FINRA/SIPC). Insurance products are offered through LPL or its licensed affiliates. To the extent you are receiving investment advice from a separately registered independent investment adviser that is not an LPL Financial affiliate, please note LPL Financial makes no representation with respect to such entity.

- Not Insured by FDIC/NCUA or Any Other Government Agency - Not Bank/Credit Union Guaranteed - Not Bank/Credit Union Deposits or Obligations - May Lose Value

LPL "Official" Statements: This is not an official LPL Financial ("LPL") statement. This report has been prepared by your financial professional for informational purposes only, and does not replace the statements you should receive directly either from LPL or from the investment sponsors for which LPL is the broker-dealer of records for any other outside custodian. The report estimates the total value of your investments reflected on your account statements and the value of any investments held away from LPL if you have provided information to your financial professional that allows values for those investments to be estimated. This report has been prepared from data believed to be reliable, but its accuracy and completeness is limited by the data available to LPL and the accuracy of the data provided for assets held away.

The report may include securities held in your LPL account(s) and securities held directly by an outside sponsor. Information regarding outside securities positions is limited because it is provided by a third-party source. There also are differences in the way each outside securities position is reflected based on the data provided to LPL. If available, market value is reflected for these outside positions, but performance is not calculated for all outside securities positions. Information regarding outside securities positions is limited because it is provided by a third party source.

The combined total market value on the report may represent the combination of various sources and types of accounts. This combined total is subject to potential errors from the types of data sources that contribute to it, including, manual entry errors and reliability or completeness errors. Values shown should only be used as a general guide to portfolio value, and may vary from the actual liquidation values.

Position values, size of positions, and dates also may be estimates made by your financial professional based on information you have provided. The source of all price information for tracked positions is one or more third party vendors. In addition, this report may include assumptions about transactions to balance account values in circumstances where the underlying transaction data is not readily available. Assumptions are made based on our experience and, depending on the size of the discrepancy, the assumed transaction may be recorded as an interest or dividend payment, withdrawal or deposit. Transactions assumed to be withdrawals and deposits do not impact your account performance directly. From time to time, the assumptions we make to balance account values turn out not to be accurate when we receive the actual transaction information.

Past performance is no guarantee of future results. Current values may be lower or higher than the values shown. The information contained in this report should not be relied upon for tax reporting purposes, accounting or valuation purposes. We urge you to rely on the information provided in the official account statement you receive directly from LPL, the investment sponsor, or custodian of the assets rather than this report, which is intended solely to illustrate performance and is not an official account record. We urge you to compare the information (e/g. market values, transactions, inflows, outflows, and fees) in this report with the information provided in such account statements.

Accounts held away from LPL are not covered by LPL's SIPC insurance. The LPL Financial SIPC Membership provides account protection only to those assets held at LPL. To the extent some of the other entities may be SIPC members, please contact your financial professional or the other entity or refer to the other entity's statement regarding SIPC membership.

If you are not receiving statements from your custodian, please contact your custodian directly or call LPL Financial at 800-877-7210 extension 6422.

Dynamic Reporting: Unlike your monthly statement, this Report is generated for you by your financial professional on an on-demand basis. This could mean that events not captured on your last monthly statement may be reflected on this report and therefore values on the two documents may not match. Whereas a monthly statement is a static document, this Report incorporates retroactive adjustments which are routinely posted to your account(s). An example of a routine, retroactive adjustment is dividend payments. Dividends you earn at the end of the month may not be posted to your account until several days into the subsequent month. Such dividends would not be reflected in the value of your monthly statement as those dividends would not have been paid into the account at the time your statement was created. This Report run sometime after the dividends are posted to your account would reflect the value of those dividends at the end of the month.

Fee-based Accounts: The figures for these accounts reflect the deduction of investment advisory fees. If the investment is being managed through a fee-based account or agreement, the returns are reduced by those applicable advisory fees. Refer to your Advisor's Form ADV, Part II for more information.

Performance Calculations: Performance return figures are expressed as a percentage and include the impact of the deduction of any advisory fees and transaction charges. Unless otherwise stated, performance returns are cumulative. Three different methods, time-weighted (TWR), money-weighted (IRR) and return-on-investment (ROI) are displayed on reports. The Advisory Performance Report, uses a time-weighted return. The remaining performance reports use a time-weighted return, money-weighted return or return-on-investment. The return method used on these reports is clearly labeled and can be configured by your financial professional. The time-weighted method is used to depict an account's relative rate of return, is not sensitive to contributions and withdrawals into and out of the account, and, as compared to the money-weighted method, allows clients to better compare performance against other money managers. The money-weighted return method is used to depict an account's personal rate of return, accounts for all contributions and withdrawals into and out of the account, and, as compared to the time-weighted method, better represents the client's actual investment experience during the evaluation period. When compared to the other options, return-on-investment is focused more on accounting and less on performance analysis. ROI is simply your net gain/loss (aka net change aka investment returns) expressed as a percentage of total money invested. Below is an example to clarify the difference of these three methods:

Example: Two investors begin by buying 100 shares at the end of the year's price (\$10), starting off with \$1,000. The first investor makes two subsequent purchases of 100 shares each, one at the end of May (\$14) and the other at the end of August (\$15). The second investor also makes two additional purchases of 100 shares each, but hers are at the end of April (\$8) and September (\$9). The price of the security at the end of the year is \$11, meaning the security is up 10%. The first investor shows a loss of \$600, while the second shows a gain of \$600. The time-weighted return for each investor is +10%. The money-weighted return for the first investor is -24.81% and the second investor is +35.04%. In this case, return-on-investment is -15.38% for the first investor and +22.22% for the second.

	Investor 1	Investor 2
	Dec: 100 Shares @ \$10/s	Dec: 100 Shares @ \$10/s
	May: 100 Shares @ \$14/s	Apr: 100 Shares @ \$8/s
	Aug: 100 Shares @ \$15/s	Sept: 100 Shares @ \$9/s
Net Invested	\$3,900.00	\$2,700.00
Ending Value	\$3,300.00	\$3,300.00
Net Change	-\$600.00	\$600.00
	Investor 1 Returns	Investor 2 Returns
Time Weighted (TWR)	10.00%	10.00%
Money Weighted (IRR)	-24.81%	35.04%
Return on Investment (ROI)	-15.38%	22.22%

If performance cannot be calculated for a period within the report timeframe, graphs will display a flat line and returns will display "N/A" or "-". For third party advisory programs (TMP), and outside custodians (CST), the above-noted performance calculations may differ from the methodologies used at the current or prior firm or custodian.

Outside Positions: Outside positions are securities held directly by an outside sponsor rather than in an LPL account. They include positions held in accounts identified in the "Location" column with a term other than "LPL." There may be differences in the way each outside position is reflected based on these various data sources used. If available, market value may be reflected for these outside positions. Performance may not be calculated for all outside positions. Information regarding outside positions may be limited because it is provided by a third party source.

Standard Benchmarks: Indices and benchmarks are unmanaged and cannot be invested into directly. For additional information regarding the indices that may be displayed, please contact your financial professional. Benchmark returns may not correspond exactly to the benchmark returns displayed on LPL advisory performance reports or statements.

If returns shown in a report are calculated according to the time-weighted method, returns for the benchmark will be shown based on the simple method. The simple method tracks the return of the benchmark during the reporting period without regard to the timing and value of any additions or withdrawals from your account.

If returns shown in a report are calculated according to the money-weighted method, returns for the benchmark may be shown either based on the simple method or the money-weighted method. A money-weighted benchmark return generally seeks to represent how a hypothetical investment in the benchmark would have performed based on the cash flows in your account. Because money-weighted benchmarks are based on the cash flows in your account, the benchmark returns shown in the report are not likely to be comparable to the published returns for the same benchmark.

Income: Projected income totals shown are estimated and are rounded to the nearest dollar. Total values may reflect rounding discrepancies. If information is not available to calculate income on certain securities, those income generating securities will not be displayed on the report.

Money Market Funds: Money market fund investments are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the funds seek to preserve a value of \$1.00 per share, it is possible to lose money in money market funds.

Est. Income -Estimated Annual Income (EAI): For positions with annual dividends, the Estimated Annual Income is calculated by taking the annual dividend and multiplying by the number of shares owned. If dividends are more or less frequent, the dividend rate is multiplied by the frequency of the dividend and the number of shares owned. If no rate is available, no EAI numbers will be generated. EAI for certain types of securities could include a return of principal or capital gains in which case the EAI would be overstated. EAI is an estimate and the actual income and yield might be lower or higher than the estimated amounts. Additionally the actual dividend or yield may vary depending on the security issuers' approval of paying the dividends. **Yield On Cost:** is your annual estimated income expressed a percentage of the cost of your investment. This metric can show you how efficiently your investments are earning income based on your purchase price and when compared to current-yield can often showcase the growth in income payments over time. Yield on cost cannot be used to compare with the yield of an investment alternative's stated yield. For such a comparison, refer to your investment's current yield.

Holdings Sources: Positions held in your LPL account(s) are indicated with "LPL". The terms "Outside", "CST", "TMP" or a "sponsor's name" refer to securities held or by an investment sponsor or custodian that has agreed to electronically provide information to LPL about your holdings. The source of all price information for these tracked positions is one or more third party vendors and may include the use of substitute prices for prices that are not readily available. For certain securities such as illiquid securities, pink sheet stocks, bulletin board stocks, and fixed income positions, substitute prices used in calculating performance and displayed on the report maybe prices based on trades occurring prior to the date of the missing prices. The source of all quantity information for these holdings is LPL, the prior custodian or the investment sponsor carrying your account. "TMP" represents accounts managed by an investment firm other than LPL as part of a third party advisory program. TMP accounts are held away from LPL and are not covered by LPL's SIPC Insurance. For TMP accounts, LPL's role is limited to a referral to the third party investment firm and LPL do not serve as broker-dealer. TMP accounts have not been verified by LPL. The source of all price information is the third party investment firm, a custodian or a third party vendor. "CST" represents accounts held by an outside custodian and not held or a

third party vendor. "CST" represents accounts held by an outside custodian and not held or verified by LPL nor covered by LPL's SIPC Insurance. LPL is not an investment adviser or broker dealer to CST accounts and is not responsible for the holdings or management of the CST account. The source of all price information is the custodian or a third party vendor. In addition, data from "Outside", "sponsor's name", "CST" and "TMP" accounts may also display historical data. Please be aware that you have the obligation to verify the accuracy of third party advisory programs (TMP), outside custodians (CST) through reliable written documents from the custodian holding the assets. "U" represents "Unofficial Accounts" which may contain both "tracked" and "non-tracked" positions. Tracked positions are assets not held or verified by LPL nor covered by LPL's SIPC Insurance, for which you have supplied the quantity information to your financial professional, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your financial professional. The source of all price information for these tracked positions is one or more third party vendors and may include the use of substitute prices as noted above. Non-tracked positions are assets not held or verified by LPL, for which you have supplied the price and quantity information to your financial professional, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your financial professional. LPL makes no representation or warranty as to the accuracy of the information concerning these Unofficial Accounts and non-tracked and tracked positions. Performance is not calculated in Performance Reports for Unofficial Accounts (either tracked or non-tracked assets).

Pre-June 2000 Performance Data Available Upon Request: Performance data for this report is not available at the account, position, asset class, or security level for periods prior to June 2000. Performance data for periods prior to June 2000 may be available through other reports or upon request from your Advisor. Generally, performance for assets held directly with the sponsor is not available prior to May of 2010.

LPL "Official" Statements: This is not an official LPL Financial ("LPL") statement. This report has been prepared by your financial professional for informational purposes only, and does not replace the statements you should receive directly either from LPL or from the investment sponsors for which LPL is the broker-dealer of records for any other outside custodian. The report estimates the total value of your investments reflected on your account statements and the value of any investments held away from LPL if you have provided information to your financial professional that allows values for those investments to be estimated. This report has been prepared from data believed to be reliable, but its accuracy and completeness is limited by the data available to LPL and the accuracy of the data provided for assets held away.

The report may include securities held in your LPL account(s) and securities held directly by an outside sponsor. Information regarding outside securities positions is limited because it is provided by a third-party source. There also are differences in the way each outside securities position is reflected based on the data provided to LPL. If available, market value is reflected for these outside positions, but performance is not calculated for all outside securities positions. Information regarding outside securities positions is limited because it is provided by a third party source.

The combined total market value on the report may represent the combination of various sources and types of accounts. This combined total is subject to potential errors from the types of data sources that contribute to it, including, manual entry errors and reliability or completeness errors. Values shown should only be used as a general guide to portfolio value, and may vary from the actual liquidation values.

Position values, size of positions, and dates also may be estimates made by your financial professional based on information you have provided. The source of all price information for tracked positions is one or more third party vendors. In addition, this report may include assumptions about transactions to balance account values in circumstances where the underlying transaction data is not readily available. Assumptions are made based on our experience and, depending on the size of the discrepancy, the assumed transaction may be recorded as an interest or dividend payment, withdrawal or deposit. Transactions assumed to be withdrawals and deposits do not impact your account performance directly. From time to time, the assumptions we make to balance account values turn out not to be accurate when we receive the actual transaction information.

Past performance is no guarantee of future results. Current values may be lower or higher than the values shown. The information contained in this report should not be relied upon for tax reporting purposes, accounting or valuation purposes. We urge you to rely on the information provided in the official account statement you receive directly from LPL, the investment sponsor, or custodian of the assets rather than this report, which is intended solely to illustrate performance and is not an official account record. We urge you to compare the information (e/g. market values, transactions, inflows, outflows, and fees) in this report with the information provided in such account statements.

Accounts held away from LPL are not covered by LPL's SIPC insurance. The LPL Financial SIPC Membership provides account protection only to those assets held at LPL. To the extent some of the other entities may be SIPC members, please contact your financial professional or the other entity or refer to the other entity's statement regarding SIPC membership.
If you are not receiving statements from your custodian, please contact your custodian directly or call LPL Financial at 800-877-7210 extension 6422.

Dynamic Reporting: Unlike your monthly statement, this Report is generated for you by your financial professional on an on-demand basis. This could mean that events not captured on your last monthly statement may be reflected on this report and therefore values on the two documents may not match. Whereas a monthly statement is a static document, this Report incorporates retroactive adjustments which are routinely posted to your account(s). An example of a routine, retroactive adjustment is dividend payments. Dividends you earn at the end of the month may not be posted to your account until several days into the subsequent month. Such dividends would not be reflected in the value of your monthly statement as those dividends would not have been paid into the account at the time your statement was created. This Report run sometime after the dividends are posted to your account would reflect the value of those dividends at the end of the month.

Fee-based Accounts: The figures for these accounts reflect the deduction of investment advisory fees. If the investment is being managed through a fee-based account or agreement, the returns are reduced by those applicable advisory fees. Refer to your Advisor's Form ADV, Part II for more information.

Performance Calculations: Performance return figures are expressed as a percentage and include the impact of the deduction of any advisory fees and transaction charges. Unless otherwise stated, performance returns are cumulative.

Three different methods, time-weighted (TWR), money-weighted (IRR) and return-on-investment (ROI) are displayed on reports. The Advisory Performance Report, uses a time-weighted return. The remaining performance reports use a time-weighted return, money-weighted return or return-on-investment. The return method used on these reports is clearly labeled and can be configured by your financial professional. The time-weighted method is used to depict an account's relative rate of return, is not sensitive to contributions and withdrawals into and out of the account, and, as compared to the money-weighted method, allows clients to better compare performance against other money managers. The money-weighted return method is used to depict an account's personal rate of return, accounts for all contributions and withdrawals into and out of the account, and, as compared to the time-weighted method, better represents the client's actual investment experience during the evaluation period. When compared to the other options, return-on-investment is focused more on accounting and less on performance analysis. ROI is simply your net gain/loss (aka net change aka investment returns) expressed as a percentage of total money invested. Below is an example to clarify the difference of these three methods:

Example: Two investors begin by buying 100 shares at the end of the year's price (\$10), starting off with \$1,000. The first investor makes two subsequent purchases of 100 shares each, one at the end of May (\$14) and the other at the end of August (\$15). The second investor also makes two additional purchases of 100 shares each, but hers are at the end of April (\$8) and September (\$9). The price of the security at the end of the year is \$11, meaning the security is up 10%. The first investor shows a loss of \$600, while the second shows a gain of \$600. The time-weighted return for each investor is +10%. The money-weighted return for the first investor is -24.81% and the second investor is +35.04%. In this case, return-on-investment is -15.38% for the first investor and +22.22% for the second.

	Investor 1	Investor 2
	Dec: 100 Shares @ \$10/s	Dec: 100 Shares @ \$10/s
	May: 100 Shares @ \$14/s	Apr: 100 Shares @ \$8/s
	Aug: 100 Shares @ \$15/s	Sept: 100 Shares @ \$9/s
Net Invested	\$3,900.00	\$2,700.00
Ending Value	\$3,300.00	\$3,300.00
Net Change	-\$600.00	\$600.00
	Investor 1 Returns	Investor 2 Returns
Time Weighted (TWR)	10.00%	10.00%
Money Weighted (IRR)	-24.81%	35.04%
Return on Investment (ROI)	-15.38%	22.22%

If performance cannot be calculated for a period within the report timeframe, graphs will display a flat line and returns will display "N/A" or "-". For third party advisory programs (TMP), and outside custodians (CST), the above-noted performance calculations may differ from the methodologies used at the current or prior firm or custodian.

Standard Benchmarks: Indices and benchmarks are unmanaged and cannot be invested into directly. For additional information regarding the indices that may be displayed, please contact your financial professional. Benchmark returns may not correspond exactly to the benchmark returns displayed on LPL advisory performance reports or statements.

If returns shown in a report are calculated according to the time-weighted method, returns for the benchmark will be shown based on the simple method. The simple method tracks the return of the benchmark during the reporting period without regard to the timing and value of any additions or withdrawals from your account.

If returns shown in a report are calculated according to the money-weighted method, returns for the benchmark may be shown either based on the simple method or the money-weighted method. A money-weighted benchmark return generally seeks to represent how a hypothetical investment in the benchmark would have performed based on the cash flows in your account. Because money-weighted benchmarks are based on the cash flows in your account, the benchmark returns shown in the report are not likely to be comparable to the published returns for the same benchmark.

Holdings Sources: Positions held in your LPL account(s) are indicated with "LPL". The terms "Outside", "CST", "TMP" or a "sponsor's name" refer to securities held or by an investment sponsor or custodian that has agreed to electronically provide information to LPL about your holdings. The source of all price information for these tracked positions is one or more third party vendors and may include the use of substitute prices for prices that are not readily available. For certain securities such as illiquid securities, pink sheet stocks, bulletin board stocks, and fixed income positions, substitute prices used in calculating performance and displayed on the report maybe prices based on trades occurring prior to the date of the missing prices. The source of all quantity information for these holdings is LPL, the prior custodian or the investment sponsor carrying your account. "TMP" represents accounts managed by an investment firm other than LPL as part of a third party advisory program. TMP accounts are held away from LPL and are not covered by LPL's SIPC Insurance. For TMP accounts, LPL's role is limited to a referral to the third party investment firm and LPL do not serve as broker-dealer. TMP accounts have not been verified by LPL. The source of all price information is the third party investment firm, a custodian or a third party vendor. "CST" represents accounts held by an outside custodian and not held or a third party vendor. "CST" represents accounts held by an outside custodian and not held or verified by LPL nor covered by LPL's SIPC Insurance. LPL is not an investment adviser or broker dealer to CST accounts and is not responsible for the holdings or management of the CST account. The source of all price information is the custodian or a third party vendor. In addition, data from "Outside", "sponsor's name", "CST" and "TMP" accounts may also display historical data. Please be aware that you have the obligation to verify the accuracy of third party advisory programs (TMP), outside custodians (CST) through reliable written documents from the custodian holding the assets. "U" represents "Unofficial Accounts" which may contain both "tracked" and "non-tracked" positions. Tracked positions are assets not held or verified by LPL nor covered by LPL's SIPC Insurance, for which you have supplied the quantity information to your financial professional, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your financial professional. The source of all price information for these tracked positions is one or more third party vendors

and may include the use of substitute prices as noted above. Non-tracked positions are assets not held or verified by LPL, for which you have supplied the price and quantity information to your financial professional, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your financial professional. LPL makes no representation or warranty as to the accuracy of the information concerning these Unofficial Accounts and non-tracked and tracked positions. Performance is not calculated in Performance Reports for Unofficial Accounts (either tracked or non-tracked assets).

Pre-June 2000 Performance Data Available Upon Request: Performance data for this report is not available at the account, position, asset class, or security level for periods prior to June 2000. Performance data for periods prior to June 2000 may be available through other reports or upon request from your Advisor. Generally, performance for assets held directly with the sponsor is not available prior to May of 2010.

Portfolio Manager Report Disclosures

This is not an official LPL Financial ("LPL") statement and does not replace the statements you should receive directly from LPL or an investment sponsor. We urge you to compare the information (e.g., market values, transactions, inflows, outflows and fees) in this report with the information provided in the account statements you receive directly from LPL or the investment sponsor or custodian of the assets. This report has been prepared by your Financial Advisor for informational purposes only and is based on information provided by you, the investment sponsor, custodian of your assets, or what LPL has on its books and records. No representation is being made as to its accuracy or completeness. Position values shown may be actual values or estimates made by your Financial Advisor. Values shown should only be used as a general guide to position value and may vary from the actual liquidation value. Values shown may be as of a date prior to the date of the report. The information contained in this report should not be relied upon for tax reporting purposes. If a price is missing for a certain date, the report may use a substitute price from within the 30 days prior to the missing price date. Past performance is no guarantee of future results. Current performance may be lower or higher than the performance shown. Please contact your Financial Advisor to obtain performance current to the most recent month. If you have any questions, please contact your Financial Advisor at (800) 519-4015. (01/19)

Performance Calculations Performance return figures are expressed as a percentage and include the impact of the deduction of any advisory fees and transaction charges. Unless otherwise stated, performance returns are cumulative. Two different methods, time-weighted and money-weighted, are displayed on reports. The Advisory Performance Report uses a time-weighted return. The remaining reports use either a time-weighted or money-weighted return. The return method used on these reports is clearly labeled and can be configured by your Financial Advisor. The time-weighted method is used to depict an account's relative rate of return, is not sensitive to contributions and withdrawals into and out of the account, and, as compared to the money-weighted method, allows clients to better compare performance against other money managers. The money-weighted return method is used to depict an account's personal rate of return, accounts for all contributions and withdrawals into and out of the account, and, as compared to the time-weighted method, better represents the client's actual investment experience during the evaluation period. On your performance reports, money-weighted returns are denoted with IRR while time-weighted returns are denoted with TWR. Below is an example to clarify the difference of these two methods:

Example: Two investors begin by buying 100 shares at the end of the years' price (\$10), starting off with \$1,000. The first investor makes two subsequent purchases of 100 shares each, one at the end of May (\$14) and the other at the end of August (\$15). The second investor also makes two additional purchases of 100 shares each, but hers are at the end of April (\$8) and September (\$9). The price of the security at the end of the year is \$11, meaning the security is up 10%. The first investor shows a loss of \$600, while the second shows a gain of \$600. The time-weighted return for each investor is 10%. The money-weighted return for the first investor is -24.86% and the second investor is +35.16%.

	Investor 1	Investor 2
	Dec: 100 Shares @ \$10/s	Dec: 100 Shares @ \$10/s
	May: 100 Shares @ \$14/s	Apr: 100 Shares @ \$8/s
	Aug: 100 Shares @15/s	Sept: 100 Shares @9/s
Net Invested	\$3,900.00	\$2,700.00
Ending Value	\$3,300.00	\$3,300.00
Net Change	-\$600.00	\$600.00
Time Weighted (TWR)	10.00%	10.00%
Money Weighted (IRR)	-24.86%	35.16%

If performance cannot be calculated for a period within the report timeframe, graphs will display a flat line and returns will display "N/A" or "---". For third party advisory programs (TMP), and outside custodians (CST), the above-noted performance calculations may differ from the methodologies used at the current or prior firm or custodian.

Purchase Date Purchase date reflects the earliest purchase date for any portion of the position. Additional purchases may have been made after the initial purchase.

Special Note about Certain Performance Reports For the Comparative Analysis Report, only positions that were held at the Start Date and/or at the End Date will be shown; however, positions held in the account after the Start Date and sold prior to the End Date will be reflected in the performance figures shown on the report. For the Portfolio Appraisal Reports, only securities held at the End Date will be shown; however, positions held in the account on or after the Start Date and sold prior to the End Date will be reflected in the performance figures shown on the report.

Location Columns The terms used under the column with the heading "Loc," which include "LPL", "CST", "TMP," and "U" refer to securities held in your LPL account(s) or by an investment sponsor that has agreed to electronically provide information to LPL about your holdings.

"LPL" represents accounts with assets maintained at LPL.

"CST" represents accounts held by an outside custodian that are not held or verified by LPL nor covered by LPL's SIPC Insurance. LPL is not an investment advisor or broker-dealer to CST accounts and is not responsible for the holdings or management of the CST account. The source of all price information is the custodian or a third party vendor.

"TMP" represents accounts managed by an investment firm other than LPL as part of a third party advisory program. TMP accounts are held away from LPL and are not covered by LPL's SIPC

Insurance. For TMP accounts, LPL's role is limited to a referral to the third party investment firm and LPL does not serve as broker-dealer. TMP accounts have not been verified by LPL. The source of all price information is the third party investment firm, a custodian or a third party vendor.

Please be aware that you have the obligation to verify the accuracy of data for outside accounts, including CST, and TMP accounts, through confirmations, statements and other correspondence and documents you receive from the custodian holding the assets.

"U" represents "Unofficial Accounts" which may contain both "tracked" and "non-tracked" positions. Tracked positions are assets not held or verified by LPL nor covered by LPL's SIPC Insurance, for which you have supplied the quantity information to your Financial Advisor, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your Financial Advisor. The source of all price information for these tracked positions is one or more third party vendors and may include the use of substitute prices as noted above. Non-tracked positions are assets not held or verified by LPL, for which you have supplied the price and quantity information to your Financial Advisor, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your Financial Advisor. LPL makes no representation or warranty as to the accuracy of the information concerning these Unofficial Accounts and non-tracked and tracked positions. Performance is not calculated in Portfolio Manager reports for Unofficial Accounts (either tracked or non-tracked assets).

Personal Assets This report may include personal assets that the firm does not hold on your behalf, and that are not included on the firm's books and records. Personal assets include the following:

- Collectibles (e.g., art, antiques, coins, stamps)
- Real estate (e.g., personal residence, vacation homes, investment property)
- Intangible Assets (e.g., patents, trademarks, copyrights, goodwill)
- Checking and savings accounts
- Business ownership/interests (e.g., equipment, inventory, property, accounts receivables)
- Insurance
- Personal Property (e.g., cars, snowmobiles, etc.)

Information about personal assets is shown as an accommodation to you. The value of personal assets has not been verified by the firm and is included for informational purposes only. You should not use information about personal assets on this report for lending, legal, or tax purposes. You are encouraged to review and maintain any applicable source documents related to personal assets as they may contain notices, disclosures and other important information.

Outside Positions Outside positions are securities held directly by an outside sponsor rather than in an LPL account. They include positions held in accounts identified in the "Loc" column with a term other than "LPL." There may be differences in the way each outside position is reflected based on these various data sources used. If available, market value may be reflected for these outside positions. Performance may not be calculated for all outside positions. Information regarding outside positions may be limited because it is provided by a third party source.

Pre-June 2000 Data Not Available for Performance Performance for LPL accounts is not available at the account, position, asset class, or security level prior to June 2000. Generally, performance for assets held directly with the sponsor is not available prior to May of 2010.

Direct Participation Programs and Alternative Investments Direct participation program securities (e.g. partnerships, limited liability companies, fund of hedge funds, managed futures, and real estate investment trusts that are not listed on a national exchange or NASDAQ) are generally illiquid and you may not be able to liquidate. Securities prices may vary from actual liquidation value and should not be relied upon. The values for these securities generally are provided by the management of the program and represent the management's estimate of the investor's interest in the net assets of the program.

Cost Basis Transactions shown in the reports are automatically paired against holdings on a "First-In/First Out" basis (unless manually adjusted), and for this reason, may not match the cost basis provided in a trade confirmation or statement. In addition, because the cost basis on certain securities may have been provided by a source other than LPL, the cost basis on this report may not reflect accurate data or correspond to data on your trade confirmations. If cost basis is not available, N/A or "----" is used as the cost basis. For any assets purchased in the account, the cost basis is the actual purchase price including transaction charges.

Index and Benchmarks Indices and benchmarks are unmanaged and cannot be invested into directly. For additional information regarding the indices that may be displayed, please contact your Financial Advisor. Benchmark returns may not correspond exactly to the benchmark returns displayed on LPL advisory performance reports or statements.

If returns shown in a report are calculated according to the time-weighted method, returns for the benchmark will be shown based on the simple method. The simple method tracks the return of the benchmark during the reporting period without regard to the timing and value of any additions or withdrawals from your account.

If returns shown in a report are calculated according to the money-weighted method, returns for the benchmark may be shown either based on the simple method or the money-weighted method. A money-weighted benchmark return generally seeks to represent how a hypothetical investment in the benchmark would have performed based on the cash flows in your account. Because money-weighted benchmarks are based on the cash flows in your account, the benchmark returns shown in the report are not likely to be comparable to the published returns for the same benchmark.

LPL Benchmarks The LPL benchmark is calculated using a weighted average of the indices, in the percentages specified as noted above. The LPL benchmark may represent the benchmark for the current investment objective for the account or a benchmark assigned to your account or group of accounts by your Financial Advisor. Please keep in mind that the investment objective for the account may have changed over time.

Income Projected income totals shown are estimated and are rounded to the nearest dollar. Total values may reflect rounding discrepancies. If information is not available to calculate income on certain securities, those income generating securities will not be displayed on the report.

Money Market Funds Money market fund investments are not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Although the funds seek to preserve a value of \$1.00 per share, it is possible to lose money in money market funds.

Securities offered through LPL Financial, Member FINRA/SIPC. Advisory Services offered through LWM Advisory Services, LLC, a Registered Investment Advisor. Legacy Wealth Management and LWM Advisory Services, LLC are separate entities from LPL Financial.

To the extent you are receiving investment advice from a separately registered independent investment advisor, please note that LPL Financial is not an affiliate of and makes no representation with respect to such entity.

Performance results prior to June 2014 reflect the performance of investments held in your account prior to LWM Advisory Services, LLC's management of the account's investments.

Advisory services offered through LWM Advisory Services, LLC. Securities offered through LPL Financial, member FINRA/SIPC. LPL Financial, LWM Advisory Services, LLC and Modern Wealth Management are non-affiliated companies. Values are as of 05/04/2026 unless otherwise noted. **This is not an official LPL Financial ("LPL") statement; it has been prepared by your Advisor for informational purposes only, and does not replace the statements you should receive directly either from LPL or from the investment sponsors for which LPL is the broker-dealer of record or any other outside custodian.** It is intended to estimate the total value of your investments for which you receive such statements, as well as any investments held away from LPL about which you have provided to your Advisor information from which values can be estimated. This report has been prepared from data believed to be reliable but no representation is being made as to its accuracy or completeness.

The report includes securities held in your LPL account(s) or that LPL does not hold on your behalf and which are not included on LPL's books and records. These outside positions are securities held directly by an outside sponsor rather than in an LPL account. There may be differences in the way each outside securities position is reflected based on the various data sources used. If available, market value may be reflected for these outside positions. Performance may not be calculated for all outside securities positions. Information regarding outside securities positions may be limited because it is provided by a third party source.

Values shown should only be used as a general guide to portfolio value, and may vary from the actual liquidation values. Accounts held away from LPL are not covered by LPL's SIPC Insurance. The LPL Financial SIPC Membership provides account protection only to those assets held at LPL. To the extent some of the other entities may be SIPC members, please contact your financial advisor or the other entity or refer to the other entity's statement regarding SIPC membership. Position values, size of positions, and dates, may be estimates made by your Advisor based on information you have provided. The information contained in this report should not be relied upon for tax reporting purposes, accounting, or valuation purposes. The source of all price information for tracked positions is one or more third party vendors and may include the use of substitute prices where prices are not readily available.

Past performance is no guarantee of future results. Current values may be lower or higher than the values shown. We urge you to compare the information (e.g. market values, transactions, inflows, out flows, and fees) in this report with the information provided in the account statements you receive directly from LPL Financial, the investment sponsor, or custodian of the assets. If you are not receiving statements from your custodian, please contact your custodian directly or call LPL Financial at 800-558-7567.

For fee-based accounts only: The figures may or may not reflect the deduction of investment advisory fees. If the investment is being managed through a fee-based account or agreement, the returns may be reduced by those applicable advisory fees. Refer to your Advisor's Form ADV, Part II.

The Cost Basis information is subject to the validity of the supplier of cost basis information and should not be used for tax purposes. Please refer to your original statements and/or confirms.

For assets not purchased in the LPL account, you or the previous broker/dealer upon transfer may have provided the date acquired and purchase cost of the position. If no such data was submitted, N/A may be listed as the purchase Cost. N/A displays when investment information is incomplete and may be treated as zero when calculating Gain or Loss totals. Since the date acquired and the purchase cost on certain securities may have been provided by another source, this information may not reflect accurate data or correspond to data on your trade confirmations. This report may use one of the following accounting methods: First In, First Out (FIFO); Last In, First Out (LIFO); Average Cost, or Average Cost Long Term. For information on the method used, please contact your advisor.

Designating liquidations as "versus payment" date on a trade confirmation will not adjust the cost basis information on your statement or in this report. If this report includes outside accounts, manual accounts, or groups of accounts, detailed descriptions of terminology and calculations used in this report can be obtained by requesting information from your advisor.

The Modified Dietz formula is used as an approximation to the true, money-weighted rate-of-return (MWRR) or internal rate of return (IRR). The portfolio or asset is valued at the starting and ending points of the period. Cash flows are included in the calculation based on their timing (i.e., when they occurred during the period). The Modified Dietz will yield a result which approximates the IRR, which is the true, money-weighted rate-of-return. If the cash flows and returns are large, then the ability for the Modified Dietz to approximate the IRR is diminished. Otherwise, the Modified Dietz serves as an acceptable approximation to the IRR.

Positions on this statement may include assets that are not held or verified by LPL, for which you have supplied the price and quantity information to your LPL representative, through the delivery of a statement or other record prepared by the investment sponsor or other source other than your LPL representative.

This report may include personal assets that the firm does not hold on your behalf, and that are not included on the firm's books and records. Personal assets include the following:

Collectibles (e.g., art, antiques, coins, stamps)

^A This report may include assets that the firm does not hold and which are not included on the firm's books and records.

Variable Rate Securities:

Interest rate data for certain complex and/or variable rate securities is provided by third-party data service providers. Although we seek to use reliable sources of information, the accuracy, reliability, timeliness, and completeness of interest rate data may vary sometimes, particularly for complex and/or variable rate securities and those with limited or no secondary market. As a result, we can offer no assurance as to the accuracy, reliability, timeliness, or completeness of interest rate data for such securities.

When updated interest rate data is received from a third-party data service provider, the updated data will be reflected in various sources where interest rate data is used or viewed. Prior use or communication of interest rate-related data will not be revised. Since variable interest rates may be subject to change at any time and are only as accurate as the data received from third-party data service providers, interest rate data should not be relied on for making investment, trading, or tax decisions. All interest rate data and other information derived from and/or calculated using interest rates are not warranted as to accuracy, reliability, timeliness, or completeness and are subject to change without notice. We disclaim any responsibility or liability to the fullest extent permitted by applicable law for any loss or damage arising from any reliance on or use of the interest rate data or other information derived from and/or calculated using interest rates in any way. You should request a current valuation for your securities from your financial adviser or broker prior to making a financial decision or placing an order or requesting a transaction in these securities.

Introduction - Statement of Purpose

This Investment Policy Statement (IPS) is intended to provide a clear understanding between the Florida West Coast Operating Engineers Apprenticeship Trust Fund, LWM Advisory Services, LLC, advisor and Tony DuBose, Investment Advisor Representative regarding the objectives, goals, and guidelines established by the trustees for the investment of assets.

This IPS is not a contract. It is intended to assist the trustees and Advisor in effectively supervising, monitoring and evaluating the management of the trust assets. These policies will be reviewed and/or revised as necessary to reflect any changes related to the portfolio, the trustees, or the markets. There is no assurance that the goals and objectives outlined herein will be achieved.

The trustees shall promptly notify the Advisor of any changes in the investment situation.

The trustees recognize and acknowledge that risk must be assumed in order to achieve the long-term investment objectives and that there are uncertainties and complexities associated with investment markets.

The trustees understand that achievement of the trust goals and objectives are measured against long-term objectives and not against short-term market fluctuations.

1. Investment Goals

a. Risk and Time Horizon

*Investments to be focused on income, low risk Capital Preservation-oriented investments.
Time horizon (5-10 Years)*

b. Liquidity Constraints

Immediate or near-term cash requirements may create the need for more liquid assets despite the overall long-term objectives. Trustees have the following liquidity constraint(s):

Spending Policy

*The forward annual projected distribution need = **None at this time.** This amount is based upon discussions with the trustees of the portfolio.*

c. Tax Consequences/ Non-Qualified Accounts

Legacy Wealth Management and Tony DuBose do not provide tax advice. However, during the asset management process, as information is available to the Adviser, the following tax considerations communicated by Client will be observed:

Non-Profit, Not Applicable

2. Investment Objectives

The primary investment objective of the assets placed under management is *Income with Capital Preservation*, (Conservative), although the trustees acknowledge that past performance does not guarantee future results, this portfolio should be constructed to satisfy diversification and asset allocation strategies and designed to meet the goals and objectives over time.

The nature of the investment objective reflects the trust risk tolerance, time horizon and goals, and can be described as follows:

Income with Capital Preservation (Fixed Income)

- *Investors in this portfolio should have a time horizon of more than five years and be comfortable with the volatility that will occur with changing interest rates and credit risk.*
- *Emphasis is placed on generation of current income and prevention of capital loss.*
- *The primary investment objective of this portfolio is to generate income and preserve capital.*
- *A minimum of 30 % of fixed income investments are allocated to high quality U.S. Non-Corporate Bonds credit quality as rated by S&P of AA+. A maximum of 60 % of the portfolio assets may be invested in Investment Grade Corporate Bonds as rated by S&P with a credit quality of BBB or better. A maximum of 5 % of the portfolio may be invested in fixed income securities with credit quality of below investment grade as rated by S&P.*

3. Investment Guidelines

a. Asset Mix

Although there is no guarantee of success, investments in the portfolio will be prudently diversified using asset allocation methodology.

100 % US Fixed Income and cash

b. Permissible Investments

The assets under management shall be invested in a manner that is consistent with the client's goals and objectives.

Client agrees to use the following security classifications:

- **FDIC Insured Bank Certificate of Deposits**

- **Individual Debt Instruments:** United States Government Obligations, agencies of the United States Government (i.e. US Treasuries, Treasury Inflation Bonds (TIPS), debt instrument issued by Ginnie Mae, Fannie Mae, Freddie Mac, Federal Home Loan Bank, Federal Farm Credit Bank and Federal Home Loan Mortgage Corp).
- **Investment Grade Corporate Bonds** issued by US Corporations with credit quality of BBB- or better as rated by S&P. 60 % Maximum 5 % to any one issuer.
- **Cash Reserves:** Interest bearing securities, free from risk of loss, price fluctuation and instantly saleable. Shall consist of individual fixed income securities such as Certificates of Deposit, U.S. Treasury Bills, and other similar instruments with less than one year to maturity and/or money market funds (Non-Corporate).
- **Mutual Funds and Exchange Traded Funds (ETFs)** with underlying permissible assets.

c. Prohibited Investments and Transactions

Client designates the following as prohibited transactions in the account:

- **The following investments shall not be included in the account:**

Foreign Bonds may not be utilized.

Equities may not be utilized

REITS, Managed Futures, and Hedge Funds are not be utilized.

4. Investment Review

a. Performance measurement

Client represents that the following benchmark reflects investment parameters against which portfolio performance shall be compared on a regular basis:

50-% Lehman Government Credit Index 1-3 Years

50-% S&P/Citigroup US Broad Investment Grade Index

Factors influencing performance deviations will be described by the Advisor in quarterly reports to the Client.

5. Modification of Investment Policy Statement

a. Advisor/Client Meetings

Advisor and Client will meet as required to review the portfolio and investment results in the context of this Investment Policy Statement.

Factors affecting the asset management process, including the economy and interest rates, will also be discussed.

b. Modifications

Any modifications to the Investment Policy Statement shall be promptly documented and disseminated to all affected parties.

Past Modification Dates:

08/12/2021 – The FWCOE Board voted to allow up to 60 % of the fund asset to be allocated to investment grade U.S. Corporate Bonds as rated by Standard & Poor's.

C. Defining S & P Credit Ratings

'AAA'—Extremely strong capacity to meet financial commitments. Highest Rating.

'AA'—Very strong capacity to meet financial commitments.

'A'—Strong capacity to meet financial commitments, but somewhat susceptible to adverse economic conditions and changes in circumstances.

'BBB'—Adequate capacity to meet financial commitments, but more subject to adverse economic conditions.

'BBB-'—Considered lowest investment grade by market participants.

'BB+'—Considered highest speculative grade by market participants.

'BB'—Less vulnerable in the near-term but faces major ongoing uncertainties to adverse business, financial and economic conditions.

'B'—More vulnerable to adverse business, financial and economic conditions but currently has the capacity to meet financial commitments.

'CCC'—Currently vulnerable and dependent on favorable business, financial and economic conditions to meet financial commitments.

'CC'—Currently highly vulnerable.

'C'—Currently highly vulnerable obligations and other defined circumstances.

'D'—Payment default on financial commitments.

Note: Ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

This Investment Policy Statement has been reviewed and accepted by the trustees of the Trust and Adviser.
