Subject: Appion Proposal/demo follow-up, IUOE 487 Apprenticeship Automation for Growth, Ease-of-Use in FL

Hi, Mike,

Thank you (and Wally and Mark) for taking the time with Lloyd and me this morning so we could review our automated Application & Apprenticeship Management, work report/performance evals, job fair portal, certification tracking and dispatch solutions with you. We appreciate discussing the various features that would strengthen and automate IUOE 487's application, document collection, tracking and reporting, and apprentice performance management process while also saving your time and resources as you increase apprentice enrollment and completion rates.

Per our conversation, please find below our different feature packages we offer that includes our "Standard" online, mobile-friendly applications, bundled "Plus" apprenticeship package (including automated time keeping and performance ratings, apprentice profiles, job fair/events portal, etc.) and our "Premium" package (includes automated cert tracking/reminders, advanced reporting and analytics, LMS integration and member management features listed below) for your review and evaluation. We want our platform to be the best possible fit for your apprenticeship program so we like to offer multiple options and customized platform pricing based on several components, including breadth of features selected, duration of the contract, size, and more. This **Features table below** provides what's included in each package selection for IUOE 487, but we also include the following as part of our offerings for you per today's conversation:

- Automated (text/email) notifications, reminders ("nudges" for performance), group communications (1,000 unique texts/month included for free, canned texts don't count against this limit), one way messages to members
- Automated online application and collection of required documents (and optional documents)
- Unlimited users, apprentices and read-only authorizations
- 24/7/364 application collection ability, mobile-friendly, cloud-based (or on/off per your application period preferences)
- Automated logged activity tracking for audit purposes
- LMS integration (subject to API/permission, e.g. Moodle/Premium plan)
- Optional orientation/training video integration, aptitude testing, interview modules, automated questionnaire integration, etc.
- Customized reporting and dashboard for tracking of most important data/metrics for you

We also decided to include these new modules we discussed this morning, as well:

- our new **auto-translate** module for these on-line applications
- our **Job Fair/Events portal** with QR codes to help sign-up new apprentices/applicants, and BA's/Organizers can use for sign-up, as well (Plus/Premium)
- our **automated Apprentice Certification/License tracking** module (with automated reminders/nudges to prevent expirations) with QR codes for ease-of-use/self-serve reporting for contractors (Premium plan).
- eventually, we tie automated certification tracking/impending expiration notices to class offering communications (per Mike's idea), but not when IUOE 487 would be implemented if in 2025
- integration application process for **new pre-apprenticeship** program, as well.
